Spatial

Understanding complex data can be challenging, we make it simple

Introducing TechnologyOne's Spatial, a way to transform your complex spatial and geographical data into easily understandable visual maps for you and your community.

Many organisations have large amounts of current and historic geographical data. This information is highly valuable when utilised correctly, offering deep insights that can significantly enhance customers' decision-making and planning.

Visualising spatial and geographical data transforms complex information into easily understandable visuals, aiding organisations in effective decision-making for urban planning, infrastructure development, and resource management.

These visual data maps highlight spatial relationships and patterns, enabling councils to identify issues, forecast trends, and implement strategic interventions, ultimately leading to more sustainable and resilient communities

"TechnologyOne's functionality was superior, leveraging preconfigured solutions, and it was easy for us to configure. It was also superior on the security front."

National Health Funding Body

We solve the complex to simplify life for our community

With more than 37 years' experience, TechnologyOne has pioneered Software as a Service (SaaS) for local government and higher education, empowering communities with mission-critical solutions.

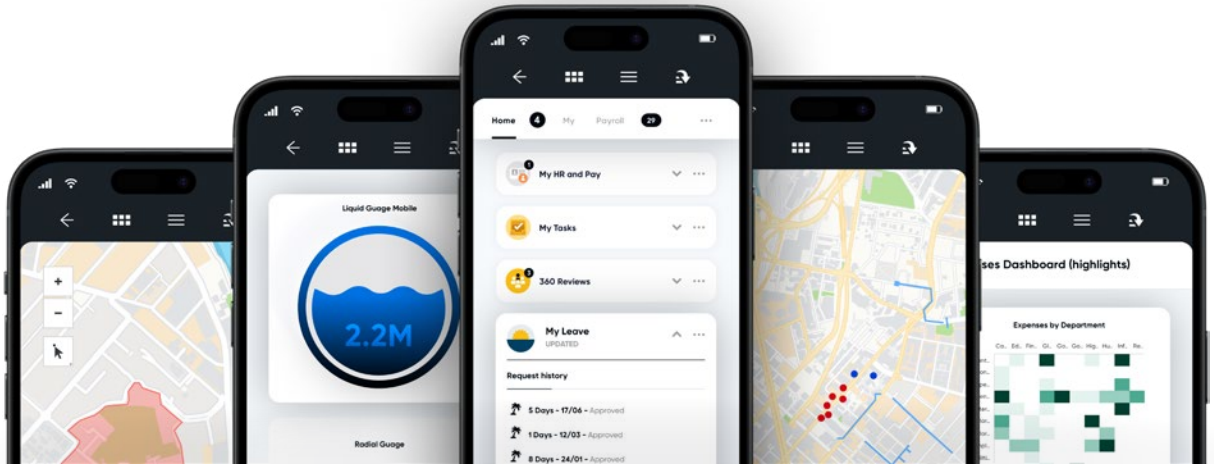
Our deep understanding and engagement with our key markets means we are able to deliver integrated, preconfigured solutions that provide proven practice, streamline implementation and reduce time, cost and risk for our customers.

We are the only company offering true global SaaS solutions, harnessing industry expertise, innovative technology and user-centred design to present unparalleled digital experiences.

Our global software enables our customers to embrace the digital revolution and an exciting new world of possibilities in a cloud-first, mobile-first world.

Over 1,300 large-scale companies, government departments and higher education institutions across the globe are supported by TechnologyOne solutions.

Future-proof your organisation with a true SaaS solution



Reinvent your system in a way no legacy software can — Software as a Service (SaaS) leverages the latest technology to deliver speed, security and scalability for your community.

SaaS delivers a mission-critical solution that empowers your organisation to provide compelling digital experiences — on any device, anywhere, at any time.

Only through the power of SaaS can your organisation embrace cutting-edge simplicity that offers a single source of truth and ensures your systems are guarded with defence-level security.

With continual upgrades, including two yearly major releases and weekly patches, empower your community with a best-in-class solution in an ever-changing environment.

Connect your organisation's information

Ensure your people have a single source of truth. With native integration, gather and retrieve information from across your organisation, in particular asset and property data, and visualise it in a central location.

Boost productivity

Increase your people's productivity and empower stakeholders to make better, faster decisions with a centralised spatial data portal available on any device, anywhere, at any time.

Deliver better customer service

Enhance your business offerings and customer service without inflating costs by providing self-service access to spatial information and interactive maps for your customers.

Expand the reach of your organisation

Transform the way your organisation creates, deploys and shares spatial information on your website, enabling more people to easily understand and access the information. Gain the flexibility to choose what information you want to publish and manage through a simple, robust mapping architecture.

Connect with your community 24/7

Customers can access interactive maps from your website for details about services and facilities, planning and zoning information, and to explore local spatial data published by your GIS team.

Maximise internal resource efficiency

Lighten the load on your customer service team and reduce call volume by making location information available on your website for the public to access.

Always up-to-date

Your organisation will be at the forefront of innovation with continual and automatic upgrades and releases all covered by one annual fee.

Secure & scalable

The highest security and privacy measures and scalability for future growth. Trusted by top Australian and New Zealand governments, authorities, businesses and education providers, our stringent cyber security safeguards data and protects your systems.

Transform data into visual insights, bring information to life

Transform the way you share information with employees, customers and residents, giving them the information they need, when they need it, in a visual format that makes sense to them with TechnologyOne Spatial.

Spatial is a core component of TechnologyOne's SaaS ERP solution, underpinning the entire enterprise. It natively integrates with the ERP suite to seamlessly gather and retrieve information from across the organisation, in particular asset and property data, into one central location and visualises it through spatial maps.

With Spatial, you're able to easily create and deploy simple-to-use maps specific to your community's needs in a matter of minutes.

Users can utilise interactive mapping tools, predictive search and mobile GPS to find information they need on everything from property and planning developments, to zoning and rubbish collection.

With one intuitive interface, our mapping application makes it easy to visualise and analyse geographical data, revealing relationships and giving your people fresh insights to guide more effective decision making.

Revolutionise how you interpret and utilise spatial data, driving efficiency, and helping your staff build a bigger picture to solve real problems.

Spatial

Enterprise Maps

Employees can access information from across your enterprise using a centralised spatial data portal on any device, anywhere, at any time. Determine changes over time, and quickly understand historic progression and the impact decisions have around city planning, infrastructure, nature protection and community service.

MapBuilder

Empower your customers to easily search within a map or via an address to find the most up-to-date information about their local services and facilities around the clock. Enable employees to create, manage and publish website-ready maps within minutes.

Public Maps

Transform the way your council creates, deploys and shares information with the public through a simple, intuitive map interface. Easy-to-use tools enable employees to quickly publish and manage your publicly available data.

Advanced Reporting

Harness the power of your spatial data and maps with our Advanced Reporting capabilities. Leveraging spatial intelligence, our reporting tool goes beyond traditional metrics, offering dynamic visualisations that overlay crucial information onto interactive maps.

CiA Maps for Enterprise Asset Management

Integrate enterprise grade mapping capabilities with your asset data. Represent spatial point, line and polygon data using styling and symbology and incorporate asset attributes.

3D Capabilities

Use embedded tools to understand and visualise on a 3D map the impact of things such as new planned buildings, or a change in the city infrastructure.

The highest level of cyber security

Secure your digital environment and reputation against threats with stringent protection across your systems.

Through the power of SaaS, continuous and automatic upgrades ensure your organisation has the latest protection against emerging threats.

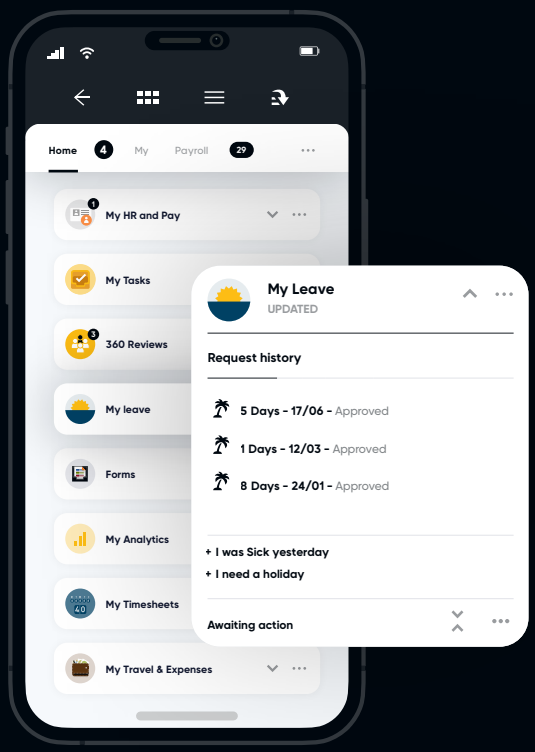
TechnologyOne is an industry-leader in cyber security, with the above security compliance certificates.

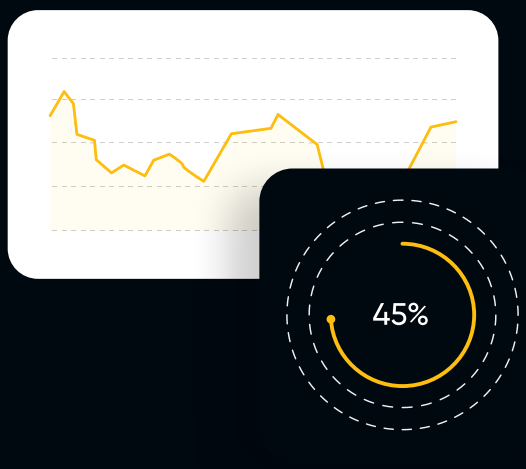
Our ~~code~~ no-code configuration

Tailor our solution for your specific needs with no programming or coding required.

Discover deep functionality for your organisation through an application that adapts to suit your unique needs. CiA is designed to seamlessly integrate with your systems to deliver an interconnected and unparalleled user experience.

Unleash streamlined functionality and cutting-edge efficiency for your organisation with faster time to value.





Real-time dashboards

Organisations must make strategic decisions to future-proof and give themselves a competitive edge.

Thrive in the face of challenges with dashboards that integrate and streamline real-time data to inform future spending and strategic decision-making.

Empower your organisation by improving efficiencies and eliminating manual and duplicated processes, reducing costs and empowering your staff to focus on your community.

SaaS+

With SaaS Plus TechnologyOne, delivers an end-to-end, customer centric solution so you can focus on serving your community.

Maximising our 'Power of One' promise, we're leveraging our unique domain expertise and taking full responsibility for the whole solution experience - reducing risk and saving you time and money.

One plan, one price, one point of call. SaaS Plus delivers:

- An all-inclusive offering tailored to the industries we serve.
- All aspects of TechnologyOne's enterprise solution.
- A single yearly fee covering all costs to implement, run, support and upgrade the solution.

Why SaaS Plus?

SaaS Plus is designed to help solve the three greatest impediments to digital transformation: time-to-value, cost, and complexity. It provides customers with a one-stop-shop, reducing much of the complexity, duplication and risk traditionally involved in ERP projects.

TechnologyOne takes complete responsibility for building, marketing, selling, implementing, supporting and running our enterprise solution for each customer, to guarantee long-term success.

SaaS Plus provides:

- Quantified scope, outcomes and approach
- Improved time-to-value – faster ROI
- Reduced project and organisational risk
- Platform for growth and business efficiency gains
- Accelerated path to a continuous improvement model

Our people

At TechnologyOne, we believe in fostering a culture of innovation, creativity, and collaboration, and have created an environment that allows our people to thrive. This culture is built into the fabric of our business, driving high performance, and underpinning our success.

Our global team of more than 1,300 passionate individuals forms the backbone of our operations. At the heart of our workforce are our more than 400 developers, powering one of the largest Australian-owned Research and Development (R&D) centres for enterprise software. In addition to our R&D centres in Brisbane and Perth, we have offshore centres in Indonesia and Vietnam, extending our capabilities to better support our customers and products.

Our developers are leaders in their field who challenge conventional thinking and go beyond the traditional realms of development methodology.

Driven by a commitment to solving complex business problems for our customers, our team has delivered a massively broad and deep global SaaS ERP solution, competing and triumphing against multinational giants with tens of thousands of staff.

Our customers are our true north guiding the decisions we make, the people we employ and the processes we create. We continue to invest in our Compelling Customer Experience program, which gives our people the ongoing training and support they need to deliver outstanding customer experiences.

About TechnologyOne

TechnologyOne is a global Software as a Service (SaaS) company. Founded in Australia, we have offices across six countries. Our enterprise SaaS solution transforms business and makes life simple for our customers by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,300 leading corporations, government departments and statutory authorities are powered by our software.

Our global SaaS solution provides deep functionality for the markets we serve, including local government and higher education in the UK. For these markets we invest significant funds each year in R&D. We also take complete responsibility to market, sell, implement, support and run our solutions for our customers, which reduce time, cost and risk.
