OneEducation

Enterprise software mobilising education institutions

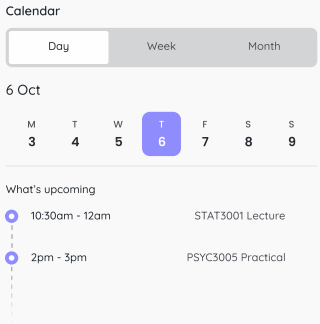

Simplify your operations and pave the way for student success

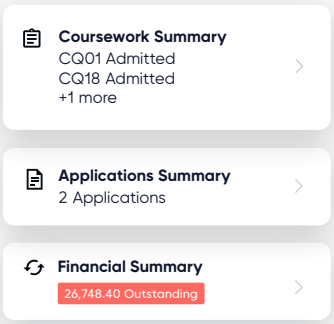

OneEducation supports the day-to-day operational, strategic and academic requirements of higher education in a single, integrated solution. Our intuitive, preconfigured solutions increase efficiency, streamline operations, reduce administrative burdens and minimise risks, making life simple for our community.

Enhance the student academic experience

From enrolment to graduation and beyond, manage the entire student lifecycle with a single solution.

- Provide personalised dashboards and self-service capabilities
- Streamline enrolments and simplify timetabling and scheduling
- Better connect students, academics and staff

Built for education

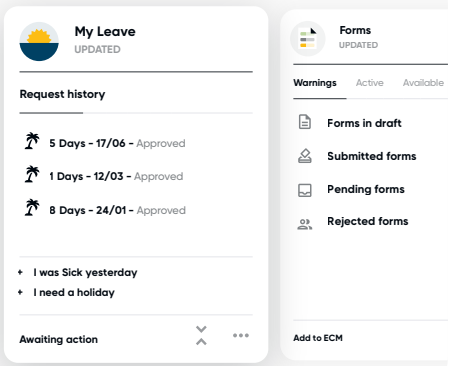

Transition to a flexible, scalable and innovative SaaS ERP solution designed for the education sector.

- Full visibility over all data
- Integration across the TechnologyOne enterprise
- Tailor the solution for specific needs
- Decrease implementation timeframes, costs and risks

Streamline operations

Boost staff satisfaction by simplifying the complex with intuitive preconfigured solutions to streamline operations.

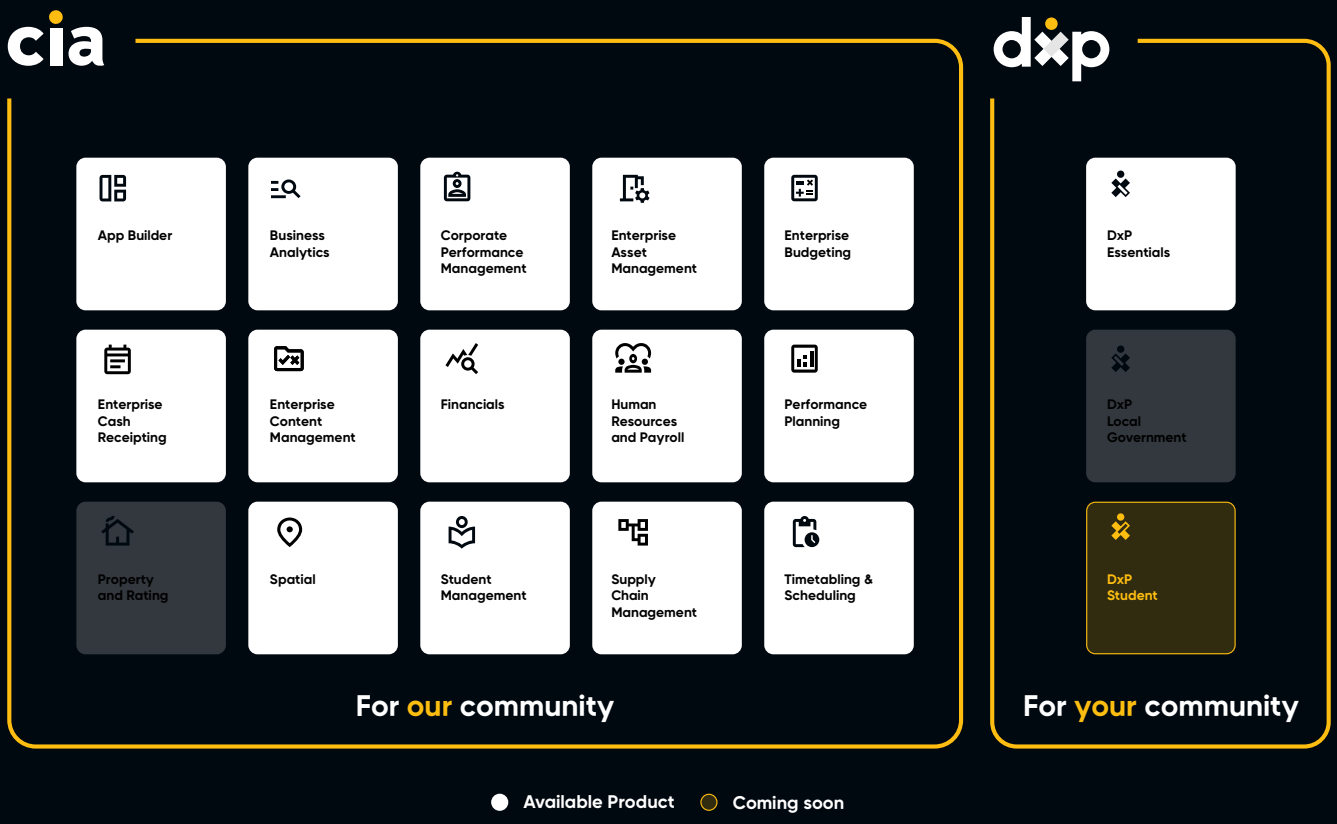

- Automate and streamline manual processes
- Intuitive, easy-to-use solutions and seamless user experience
- Access to real-time data on any device, anywhere, on any time.

Empowering over 6.5 million students globally, our global Software as a Service (SaaS) ERP solution, OneEducation, is specifically designed to meet the unique requirements of the higher education sector.

Take a closer look at what's in our OneEducation solution.

CiA and DxP are two of our industry leading platforms, created using our industry knowledge and customer experience. Access our specialised product suite via a single, intuitive enterprise platform with CiA while reaching and interacting with your customers via DxP.

"Moving to SaaS has given us a more robust platform and allowed us to deliver a cloudfirst, mobile-first experience."

LA TROBE
UNIVERSITY • AUSTRALIA

Simplify the complex

From shifting student expectations to the need for streamlined operations and processes, the pressure for higher education institutions to adapt and innovate is constant. Outdated legacy systems struggle to keep pace with modern demands, often lacking the necessary flexibility, scalability, and efficiency.

To meet these modern challenges and enhance the student academic experience, institutions must transition to agile and scalable SaaS solutions capable of driving innovation.

Adapt to the changing landscape

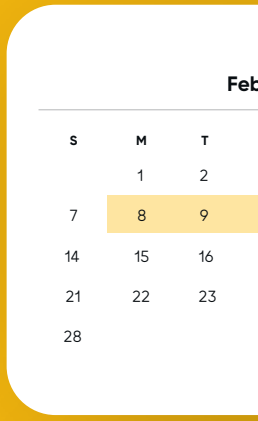

TechnologyOne's OneEducation SaaS ERP solution supports the day-to-day operations, strategic and academic requirements of higher education institutions in a single, integrated solution.

Developing ERP software since 1987, we have extensive experience partnering with leading education providers across the United Kingdom, Australia, and New Zealand, making TechnologyOne best placed to help institutions modernise, adapt to the evolving landscape, and reduce the administrative burden.

With our global SaaS ERP solution, deliver a compelling digital experience to your community, streamline operations and better connect students, staff and faculty with access anywhere, any time, on any device.

Decrease implementation timeframes, reduce costs and minimise risks with an ERP purpose-built to meet your needs.

App Builder

Build an app in the time it takes to make a coffee

Use App Builder's rich toolset to create an app within your TechnologyOne solution, for all form factors including mobile and desktop; without the need to write code.

Automate Business Processes

Organisational processes that are not managed by native ERP applications can be automated and managed within the TechnologyOne ecosystem.

Integrations

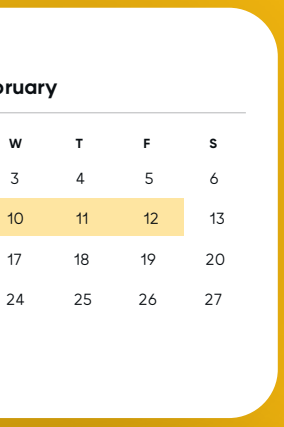

Apps can be integrated seamlessly within the TechnologyOne ecosystem and other external systems, enhancing the ability to interact with a wide variety of apps.

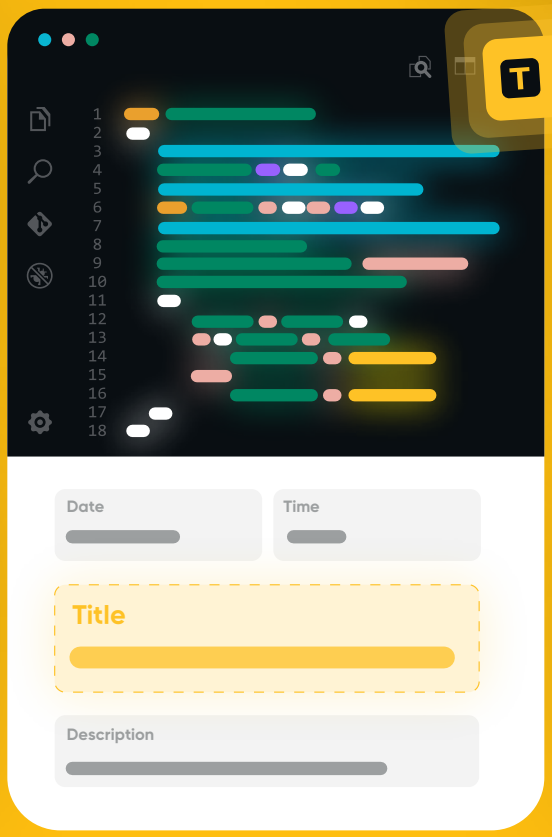

Fast Deployment

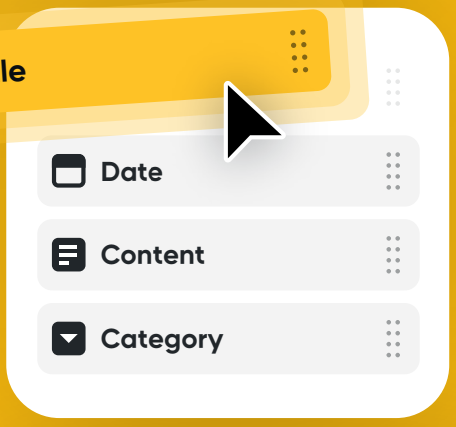

Organisations can deploy their specific applications quicker, enhancing the return on investment.

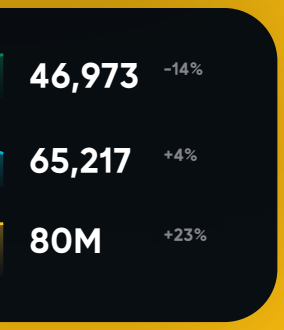

Security

Permissions and security can be applied on apps built with App Builder, allowing absolute control over the data.

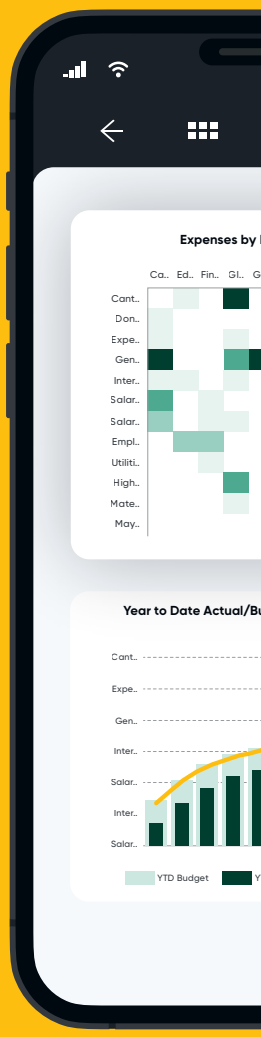

Reporting

Analytic dashboards and reports can be built using data managed by apps built using App Builder, allowing for data to be shared with other stakeholders.

Flexibility & Scalability

Apps can be adapted to evolving business needs, accommodating for new requirements and features. Supporting growth without re-development.

Business Analytics

Uncover insights, ignite success

Make everyone a data hero with a true SaaS solution that enables you to visualise, collaborate and act quickly on real-time business information. With our no-code configuration, easily build and embed analytics and customise the solution to suit your business needs. Our easy-to-use platform makes it simple for any staff to use, explore, and visualise data to make better business decisions.

Reporting

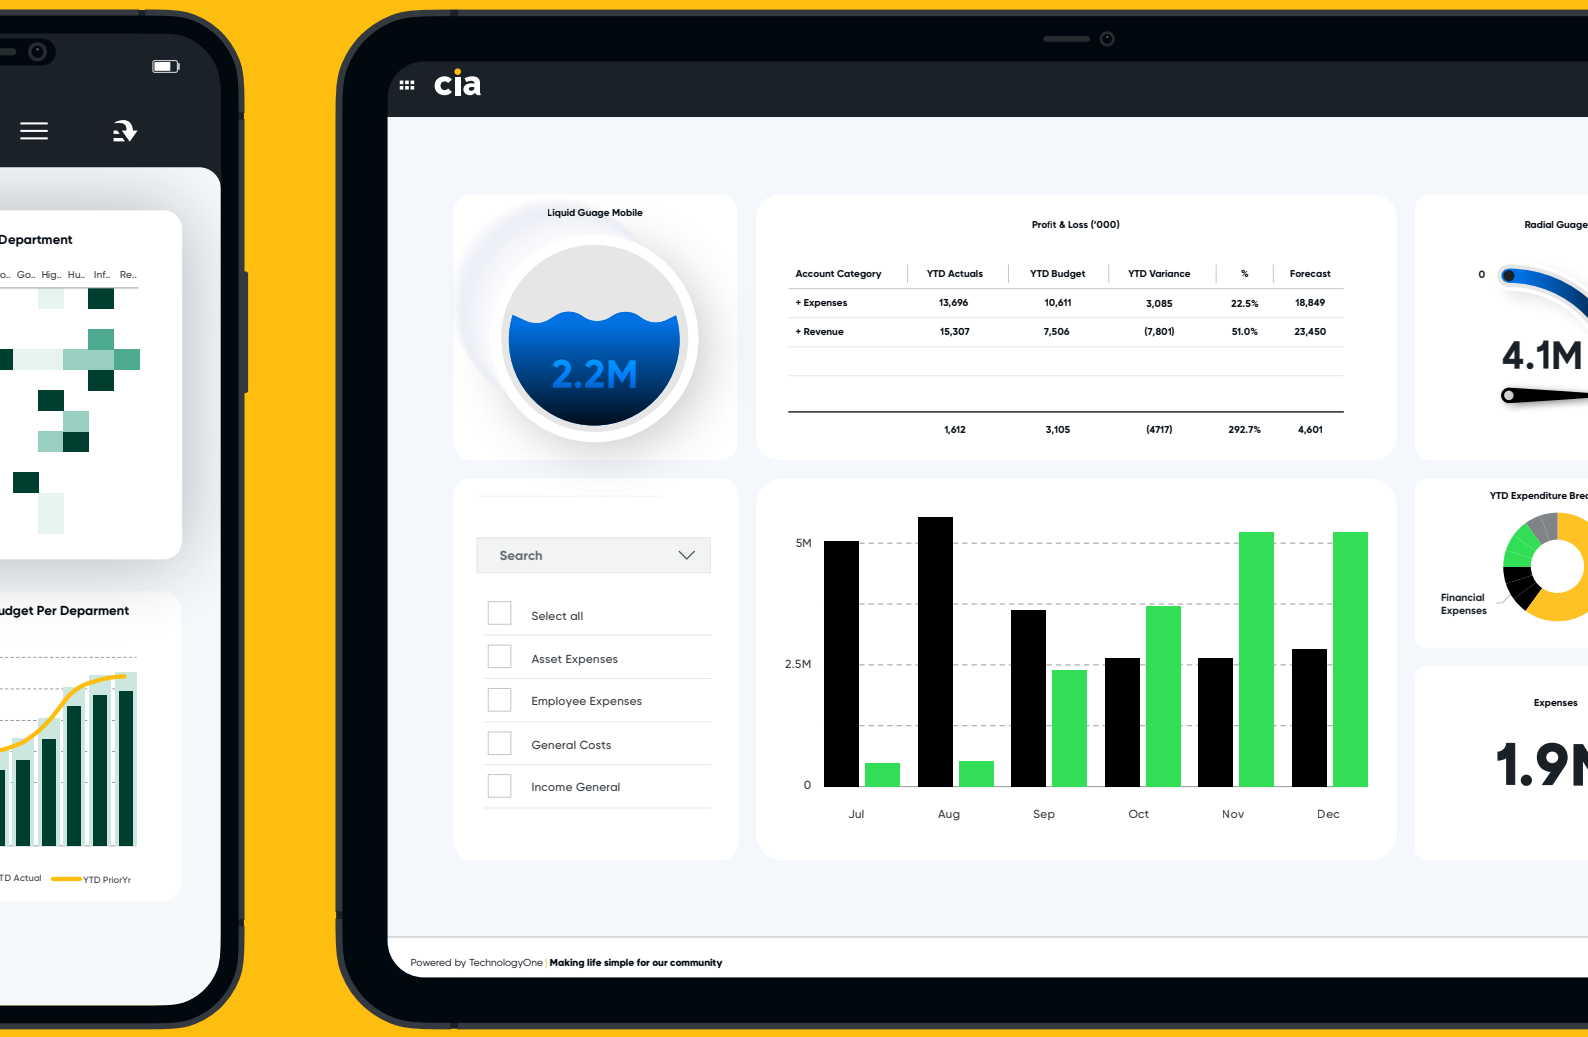

Create and automate XLOne reports tailored to your specific needs to provide easily accessible and accurate information in a recognizable and familiar format.

Configurable Analytics Enquiries

Allow staff to pivot, drill-down and analyse data in a way that suits them.

Data Exploration

With the ability to query data and apply business logic within Data Models, staff can uncover hidden patterns, trends, and correlations, enabling data-driven decision-making.

Customisable Dashboards

Quickly configure visually appealing and informative dashboards with a rich library of visualisations to choose from to effectively communicate the value of your data and drive actionable insights.

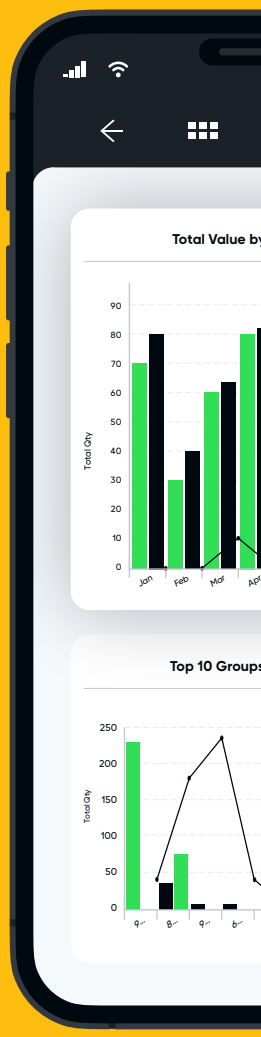

Data Visualisation

Visualise your data in real-time ensuring you always have access to the most up-to-date information. Whether monitoring key performance indicators, tracking revenue and expense trends, or analysing customer behaviour, users can make timely decisions based on the latest available data.

Integration

Business Analytics seamlessly integrates with TechnologyOne products and their data sources allowing users to leverage their data assets without the need for complex data migrations or transformations, saving time and resources while ensuring data integrity.

Corporate Performance Management

Master your data, maximise your success

Empower your people to uncover opportunities faster by ensuring everyone is working towards the same goals and enabling them to work on the go. With an integrated suite of tools to analyse enterprise-wide data, simulate and plan for possible scenarios, and generate powerful reports, all you need to do is action the insights.

Business Analytics

Harness the power of your data, gain valuable insights, and make informed decisions that drive business growth and success with Business Analytics and Analytics Enquiries. A user-friendly interface, powerful data exploration capabilities and collaborative features, empower users across your institution to uncover hidden patterns, trends and correlations, and become data-driven decision-makers.

Performance Planning

Capture performance data at the source to get a real-time view of how you're tracking against your goals. Develop strategic plans faster with customisable planning templates and link operational activities to objectives, strategies, outcomes, outputs, business units, services and projects. Easily measure outcomes against efficiency KPIs with effectiveness targets and outputs.

Extract Transform Load and Data Warehousing

Simplify the process of integrating data from various sources, both internal and external, into a unified format and store it within a data warehouse. An intuitive and user-friendly interface empowers your team to efficiently manage data extraction, transformation and loaded processes without extensive training. Streamline your data integration processes, enhance data quality, and gain valuable insights to drive informed decision-making and improve your overall performance.

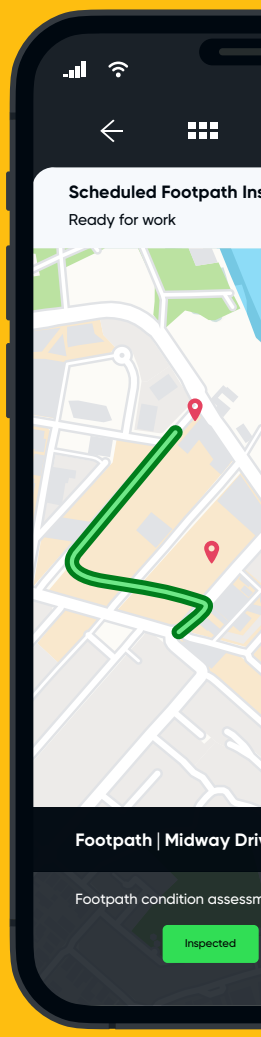

Reporting

With comprehensive audit trails and up-to-date business data at your fingertips, you can compile rich, detailed XLOne reports into any aspect of your institution's performance. Tailor the reports to your specific business requirements and automate distribution to stakeholders across the organisation ensuring the right information is delivered to the right people at the right time in a widely used and familiar Excel spreadsheet format.

Enterprise Asset Management

Maximise efficiency and minimise the complexity of your assets

Maximise the value and performance of your assets' lifecycle with a comprehensive solution that enables you to effectively increase asset life, reduce risk and build operational excellence. Transform the way you serve your community and tap into a world of efficiencies to support evidence-based decision-making and a strategic approach to your processes.

Asset Operations and Maintenance

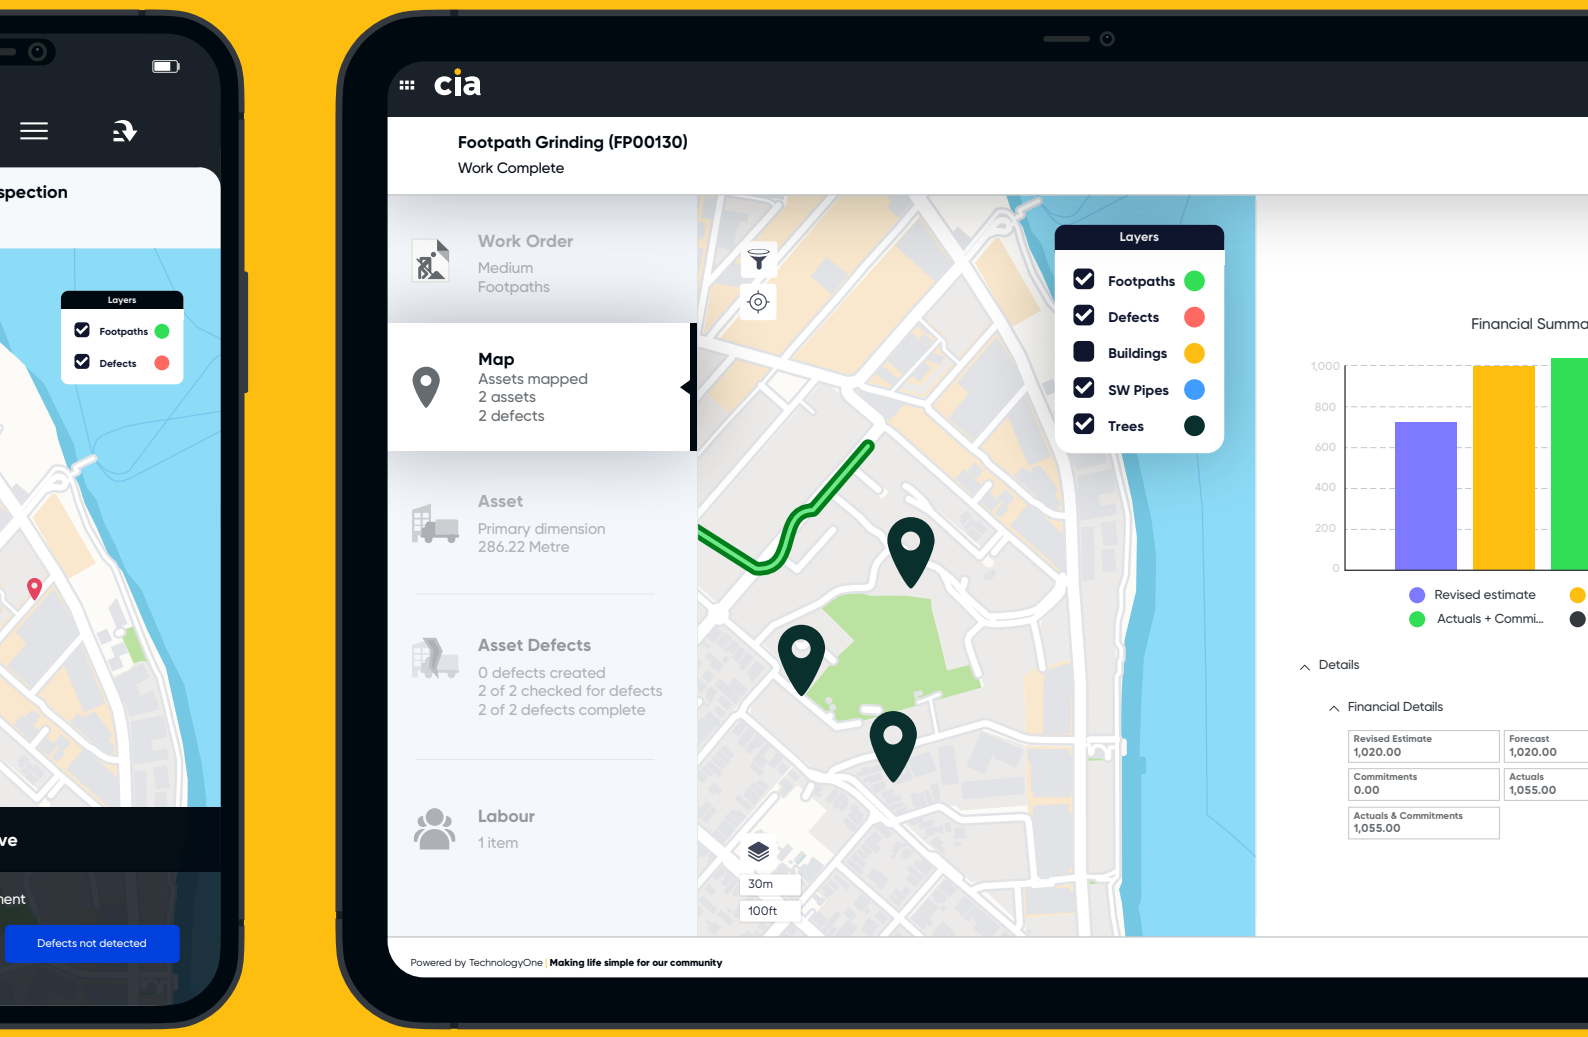

Manage your operations more effectively with full visibility into the cost and performance of every asset. Operate and maintain assets to meet regulatory and service standards.

- Operate and maintain assets to meet regulatory and service standards.
- Manage work programs efficiently to minimise asset failure and increase availability.
- Create a digitised approach to collecting and managing data in the field to improve data validity, consistency, and accuracy

Project Lifecycle Management

Take a strategic approach to your projects from prioritisation and optimisation through to delivery.

- Gain a single source of truth for all project management information and activities.
- Prioritise and optimise projects based on funding constraints and strategic priorities.
- Tailor and deliver projects based on best-practice project governance methodologies.

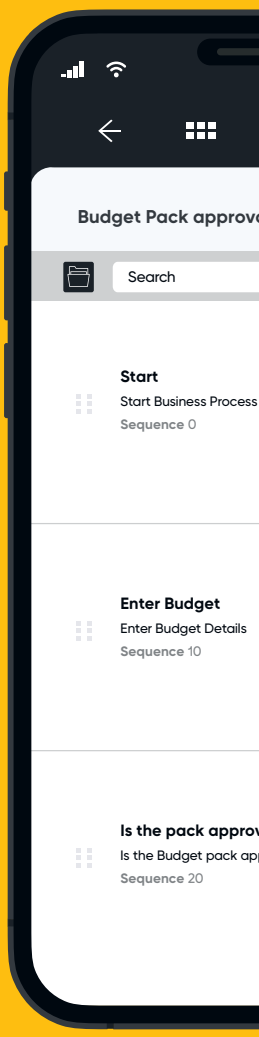

Strategic Asset Management

Make informed, evidence-based asset investment decisions with rich, comprehensive data insights to guide you and fulfil long-term infrastructure objectives.

- Manage long-term asset strategies and forecast future infrastructure needs, plan for upgrades or replacements and mitigate risk through comprehensive data insights.
- Plan and analyse future investments based on agreed service levels, risk profiles, asset condition, function, capacity, and utilisation.
- Condition-based asset valuation and Remaining Useful Life calculation.

Enterprise Budgeting

Agile and simplified budgeting to secure your financial future

Simplify your budgeting and forecasting process by transforming your financial data into an easily accessible and powerful business tool. Achieve precise budget alignment with strategic goals through collaboration and comprehensive analysis. Enabling your organisation to highlight efficiencies, increase productivity and future plan.

Centralised Data

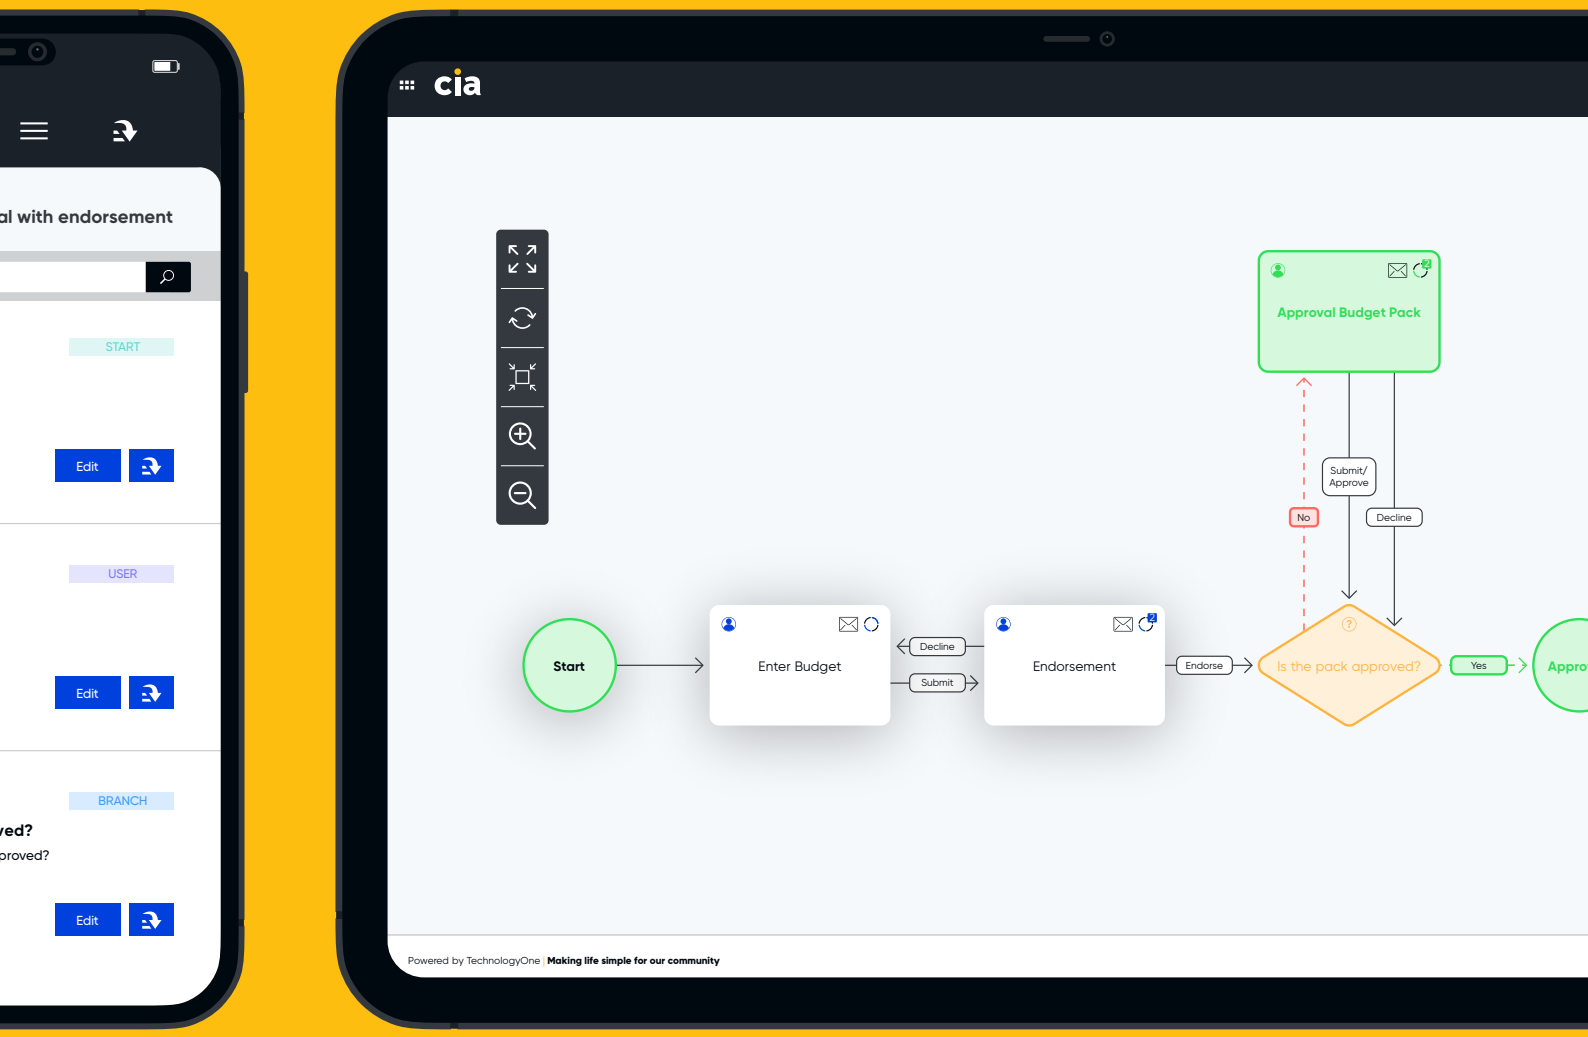

Seamlessly integrate with TechnologyOne's ERP and other business systems as required to ensure every aspect of your organisation is aligned with your success plan. Gain real-time, comparative insights and drill-down to source, providing all parts of your business with the information needed for effective budgeting and forecasting.

Flexible Budgeting

Manage financial and operational budgets using multiple budget methods to best suit your desired outcomes. Target budgeting for a top-down approach and create a tight alignment to your organisation's strategies and growth.

Rapid Deployment

Rapid deployment of the solution allows your organisation to quickly optimise company-wide planning. Budget and forecast in line with your organisation's heartbeat, with the ability to adapt time periods at any time to respond to changing conditions.

Real-time Collaboration

Our intuitive, Excel-like experience allows the many personas across your business to be easily brought into the budgeting and forecasting process without traditional adoption barriers. Budget packs and embedded analytics provide users with an environment fit for their individual or departmental needs.

Business Process Automation

Automate the calculation of budget and forecast figures based on key inputs and standard allocation plans, simplifying and streamlining the forecasting process. Devolve budget entry to involve the right people in the process, with Business Process Automation streamlining workflows and approvals.

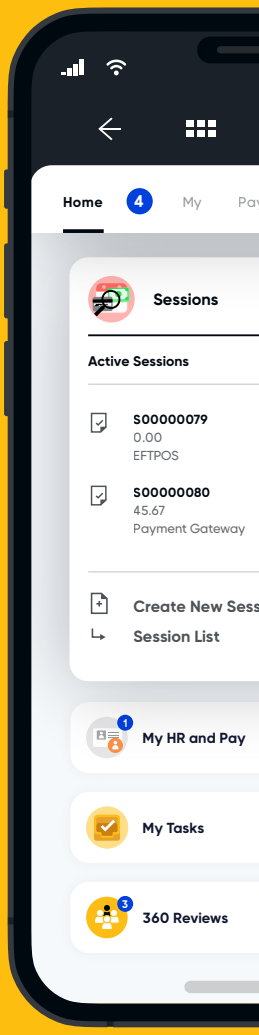

Worksheets

An intuitive interface worksheet design, in a familiar format to Excel spreadsheets, makes it easy for users to swiftly navigate, assign tasks, add commentary and have full visibility of changes in real time. Design worksheets for each of your budget drivers, to capture the information you need and support users with rapid adoption.

Enterprise Cash Receipting

Seamless payments, flawless control

Drive better customer service by streamlining their payment experience, providing a range of convenient payment options including cash, credit cards, agency payments, online shopping cart, telephone payments and more. Process all payments in one place and maintain a clear payments picture for your business.

Payment Management

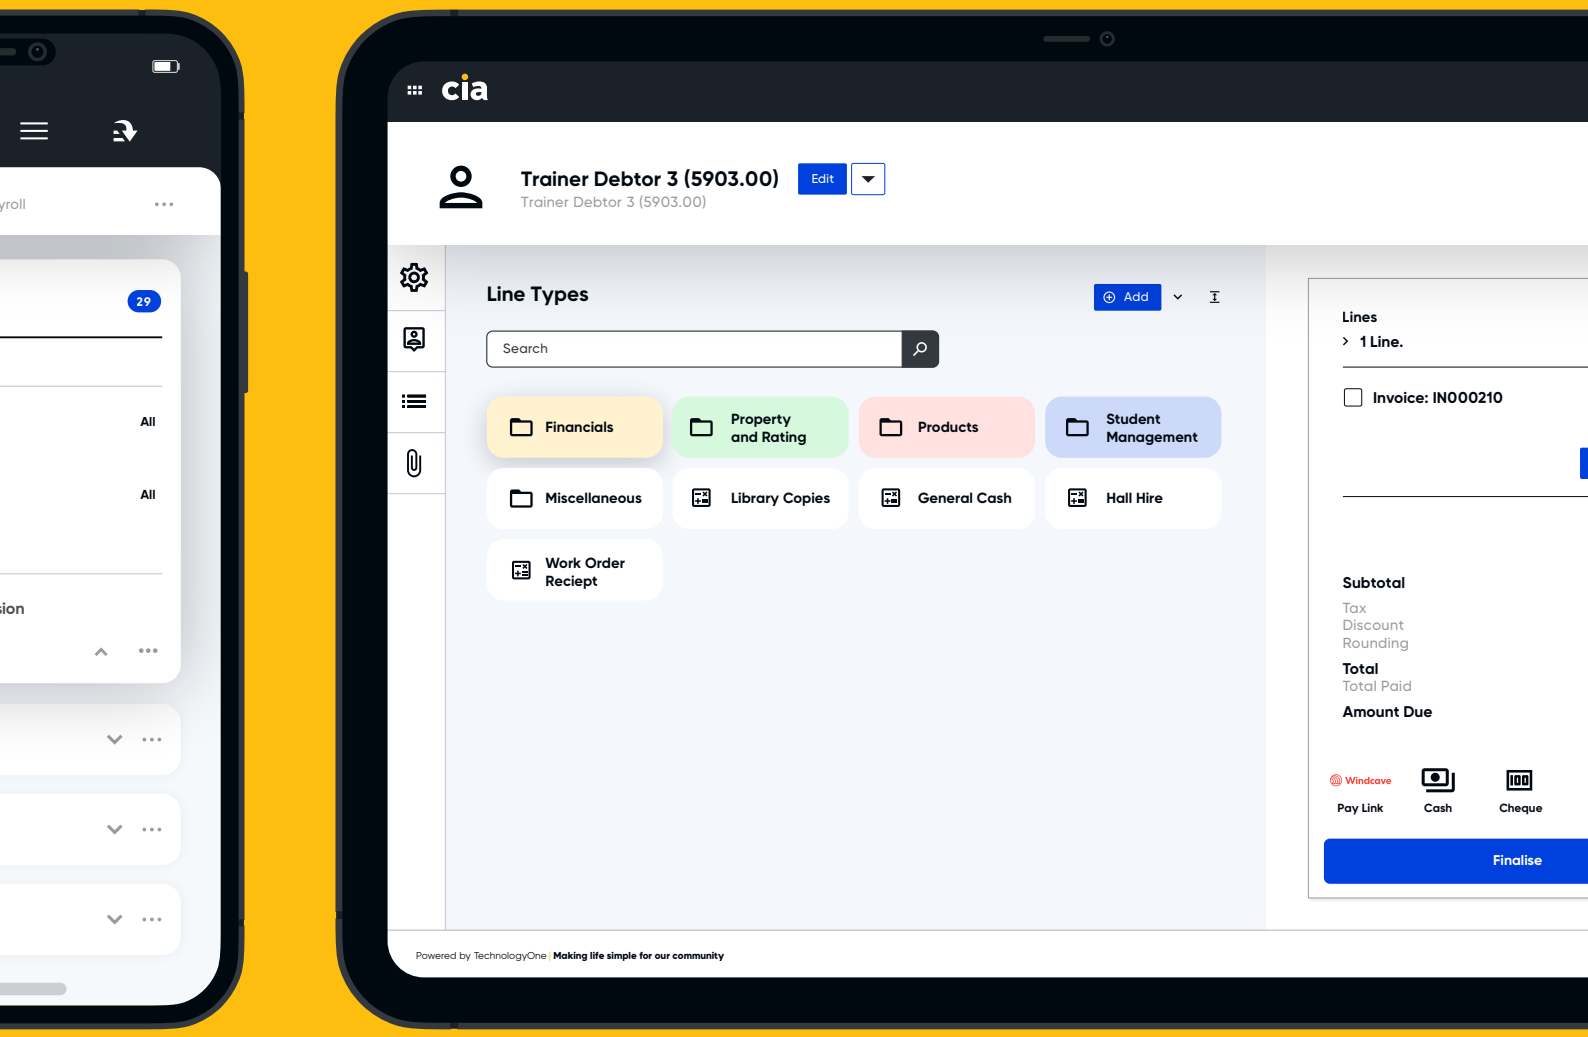

Replace multiple receipting or point of sale systems with a single receipting solution that is easy to use, requires minimal training time and resources, and enables you to manage multiple payments in one transaction.

Single Integrated Source of Truth

Fully integrated with TechnologyOne's ERP, Enterprise Receipting provides real-time validation of outstanding debt for a customer, with the ability to accept multiple types of payments from them. Drill down to the source invoice for complete traceability and improved customer service.

Online Payments

Streamline the receipting process by allowing customers, clients or end-users to manage their payment transactions via a simple web interface with Pay Now capability, on on any device, anywhere, at any time without the need for interaction with your staff.

EFTPOS Integration

Immediately capture and process payments with direct integration to EFTPOS devices for streamlined payment processing for customers and improved control and auditability for your organisation.

Multiple Payment Channels

Use payment channels that make sense for your organisation and customer needs. Take payments over the counter, via mail, telephone, online, or through banks and agencies (BPay, POSTBillPay).

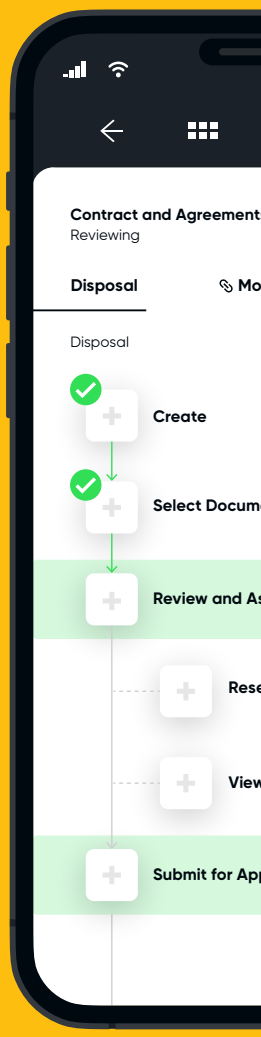

Tailored User Experience

Make the receipting experience suit your business and user needs by configuring receipting fields, layout and formatting, quick access to different payment types through POS like menu systems and defaulting values for streamlined processing.

Enterprise Content Management

Capture, collaborate and connect your content

Consolidate and centralise the storage of all your business documents, enabling frictionless content search and retrieval. Manage information assets throughout their lifecycle, from creation to disposal, to accelerate your processes with documents and records effortlessly funnelled into your central repository.

Document and Records Management

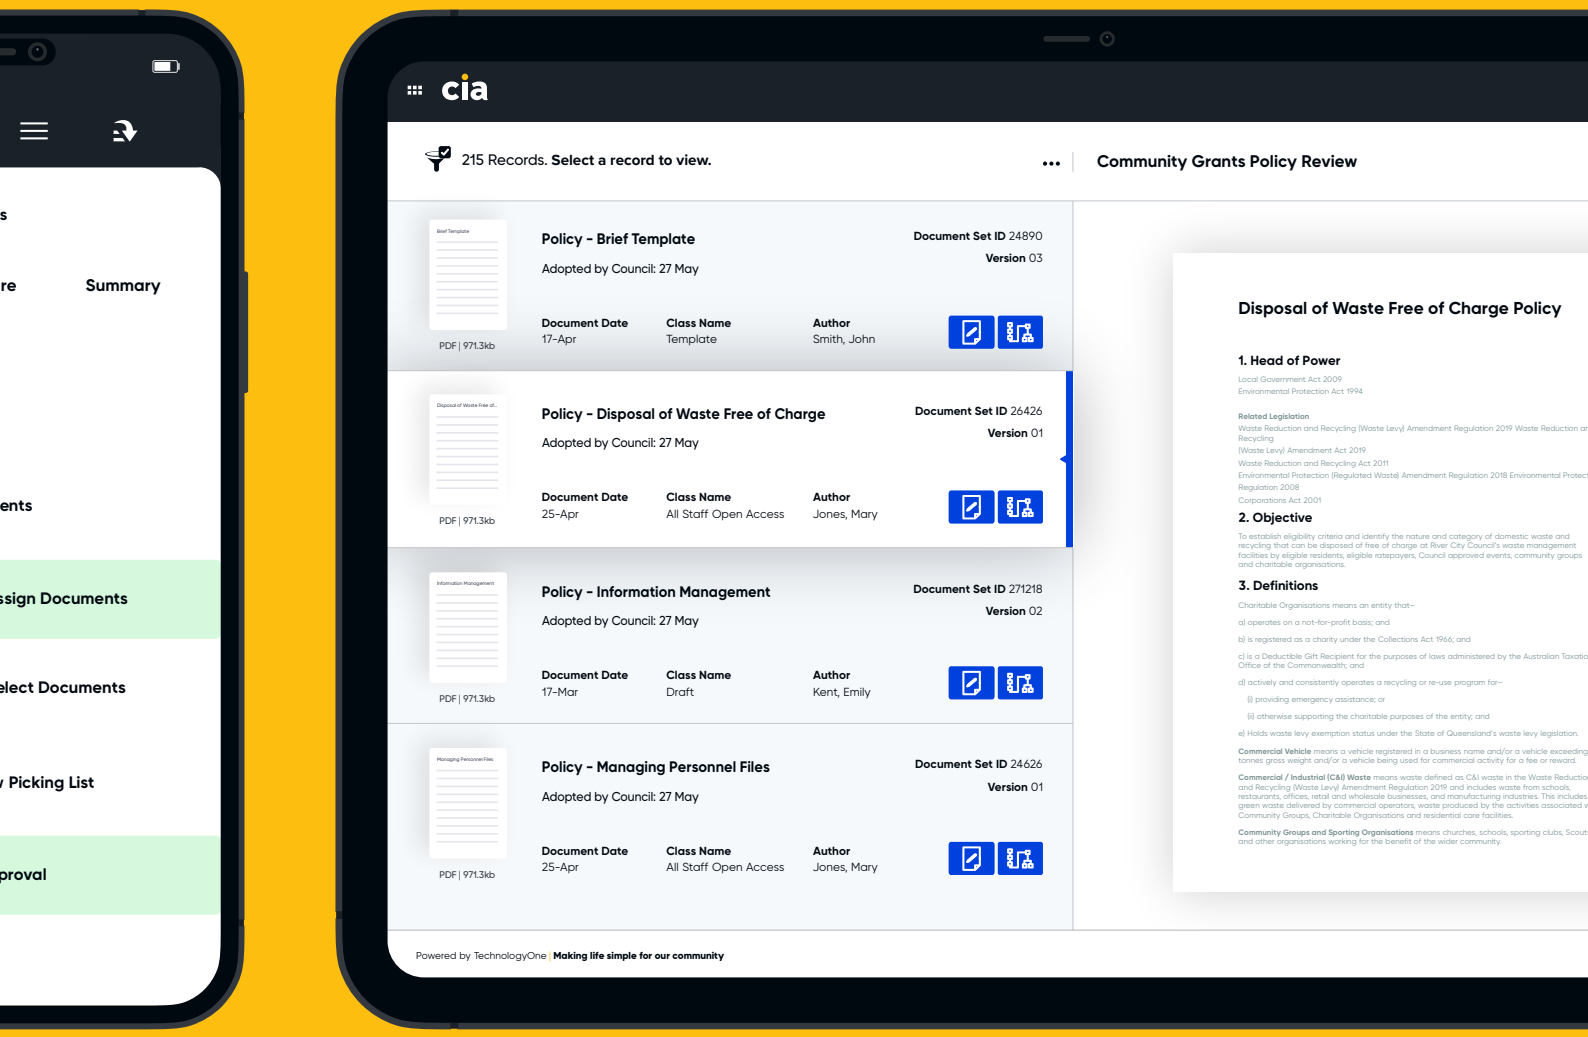

Make life simpler with a robust, proven records management solution to ensure records are appropriately managed, secured and made accessible over time.

Native and Embedded

Simplify information management across your TechnologyOne ERP with Enterprise Content Management seamlessly embedded into our solutions. Information is accessible when and where it is needed, without complex, costly and inefficient integrations.

Extensive Search Capabilities

Uncover the information you need fast with a simple, intuitive, full-text search interface that embeds with your core business systems.

Integration

Enable simpler document creation, capture and editing with seamless integration to applications such as Microsoft 365, including SharePoint, Outlook, and Google Workspace. Empower your institution with a comprehensive array of web services to enhance collaboration and compliance across your organisation.

Reporting and Analytics

Unlock the information within your solution with a set of standard reports and dashboards covering security, integrity, tasks, auditing and usage to provide better data analysis, insights and effective decision making.

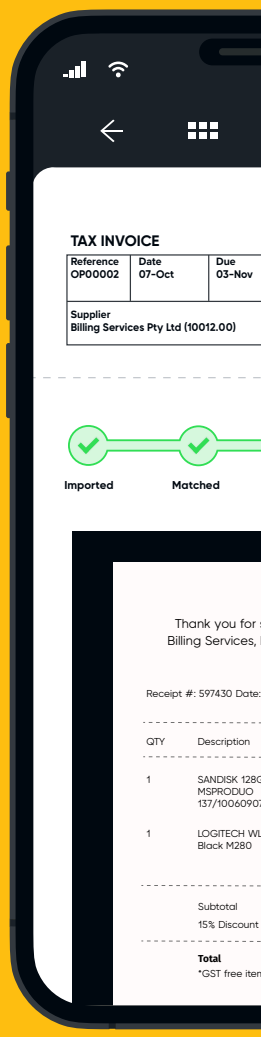

Records Compliance

Prioritise compliance with controls built into policies to manage the retention and disposal of documents. Identify, prepare and transfer digital records in accordance with relevant archival authorities for long-term preservation.

Financials

Minimise complexity, maximise efficiency

Unlock full visibility of your financial data and improve performance with real-time insights, enabling you to drill down into underlying details and understand the business impact. Bring people, data and systems together in one place and seamlessly share and analyse data in a single integrated solution, available on any device, anywhere, at any time.

Core Accounting

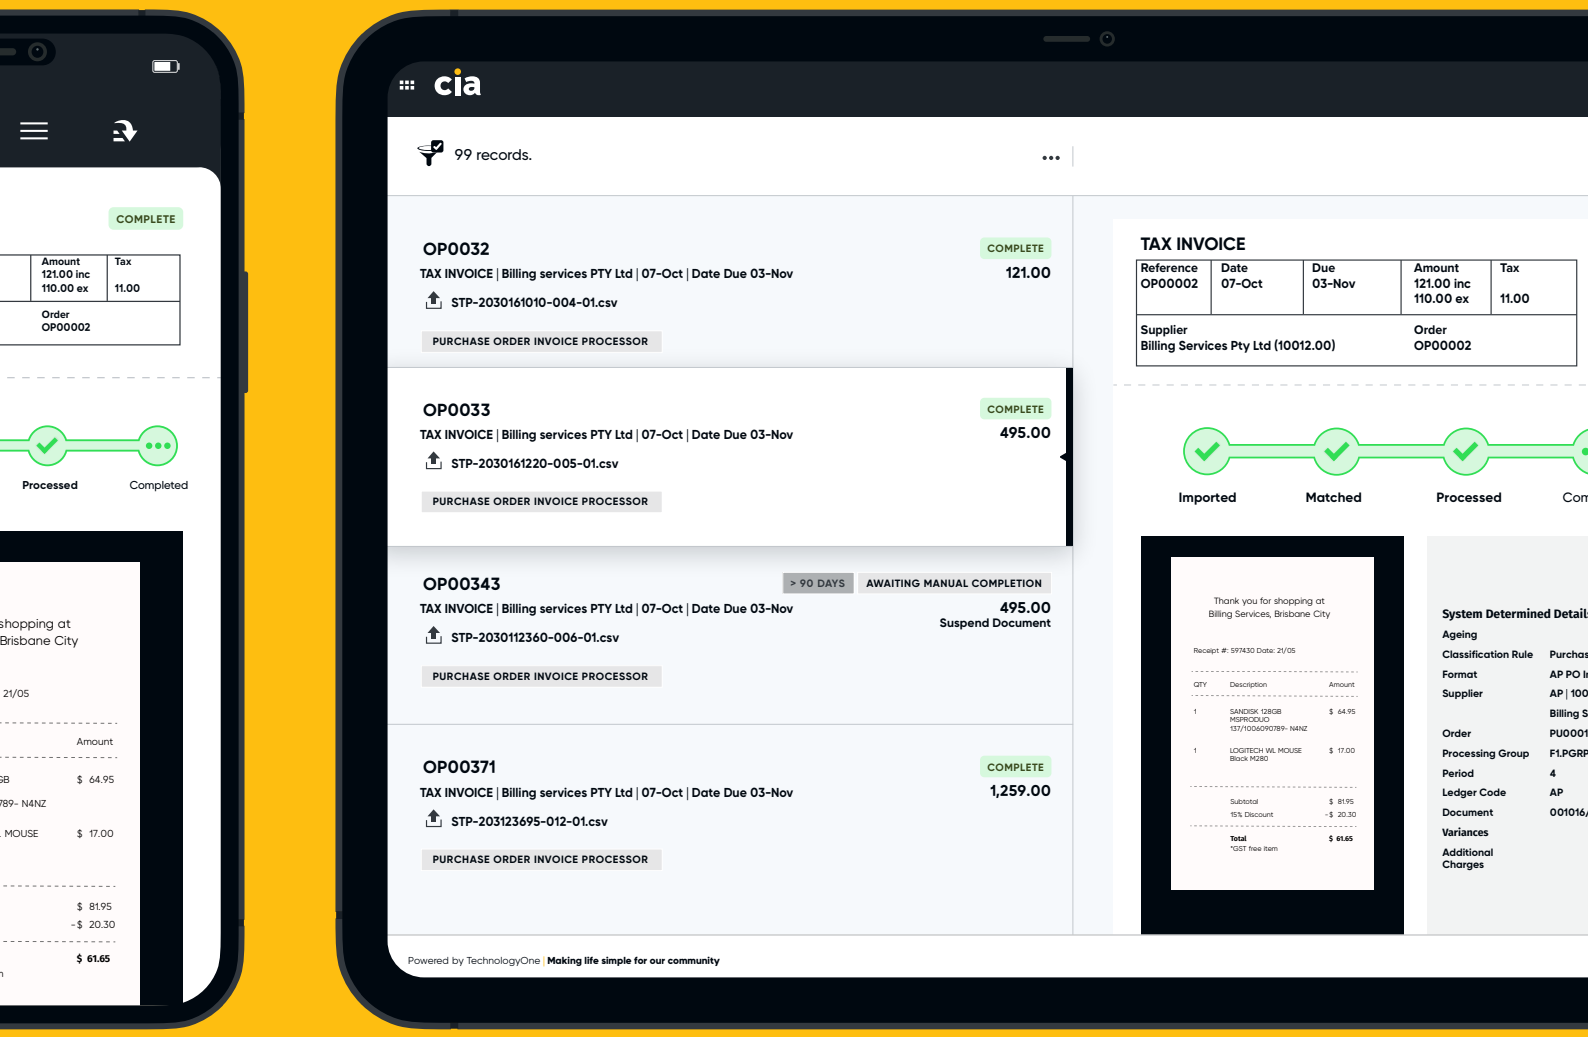

See the bigger picture and manage all financial information in one place based on your needs.

Automated Accounts Payable

Ensure suppliers are paid on time and reduce administration with automated invoice processing and approval workflows.

Cash Management

Get real-time insights across your organisation's cash flows, activities and performance.

Asset Management

Simply manage all aspects of the asset lifecycle from acquisition to disposal and get up-to-date valuations with real-time reporting.

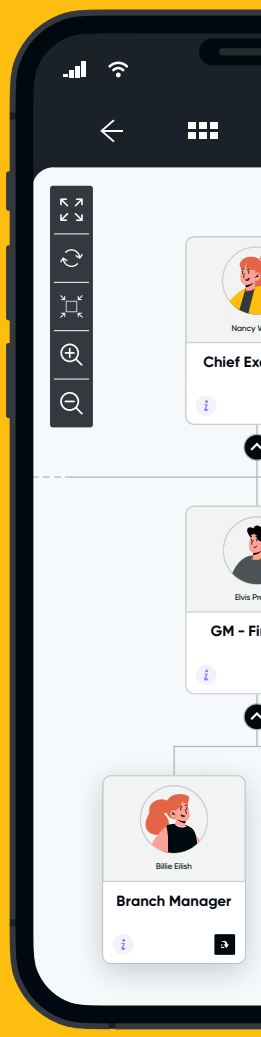

Expense Management

Improve the employee experience by empowering them to take control of their expenses and claims.

Human Resources and Payroll

Unlock potential, elevate success

From talent acquisition to performance management and succession planning, better understand your people, streamline operations and make data-driven decisions with our single integrated HR and payroll solution. Simplify administrative tasks and enhance employee engagement with intuitive interfaces tailored to your organisation's needs.

Organisation Management

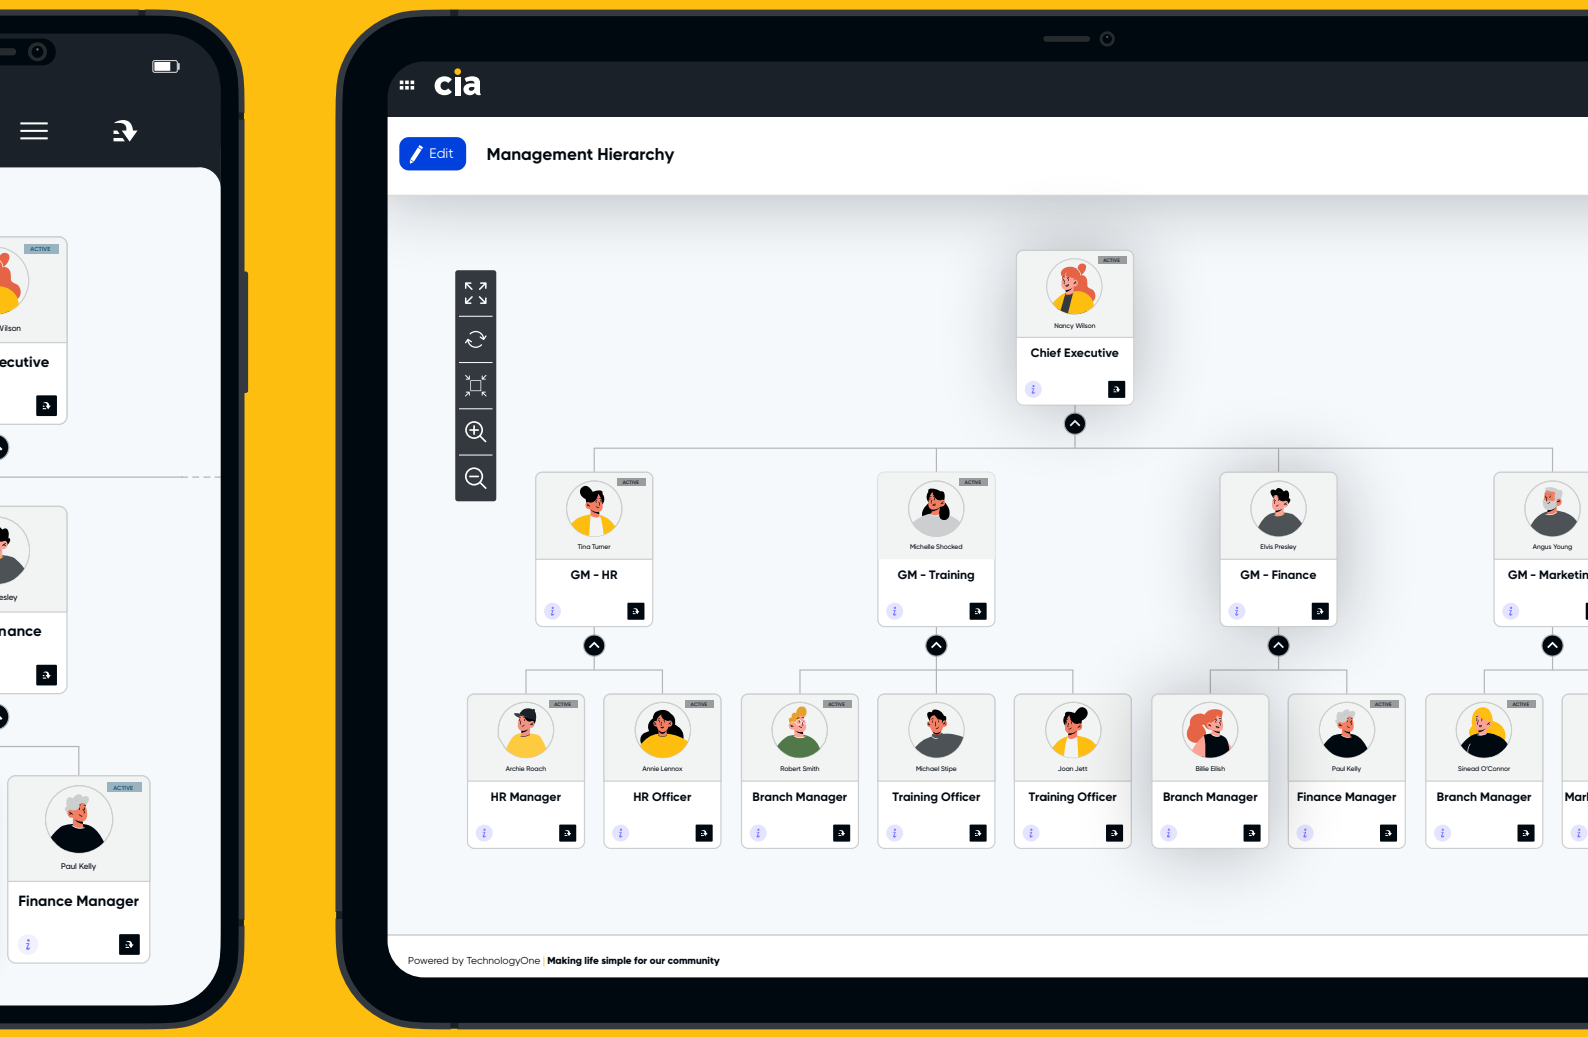

Enable smarter, faster planning by visualising your entire workforce with a simple, up-to-date and interactive organisational chart. Design new organisational structures to meet your changing business needs using our simple modelling tools.

Performance Management

Build a culture of continuous feedback and performance improvement with 360 reviews. Deepen staff engagement by using insights from reviews to accelerate appraisals and fast-track development opportunities.

Payroll

Save time and eliminate the risks of underpayment, overpayment and late payment by streamlining and automating your payroll systems with our native payroll software.

Employee Self-Service

Boost workforce engagement and save time by empowering staff to manage their own HR admin including submitting leave requests and timesheets, updating details and completing training, with simple self-service tools.

Multiple Assignments

Where employees hold more than one position, enable true separation of all HR & Payroll functions for each role and line manager with a consolidated Employee and Payroll Record.

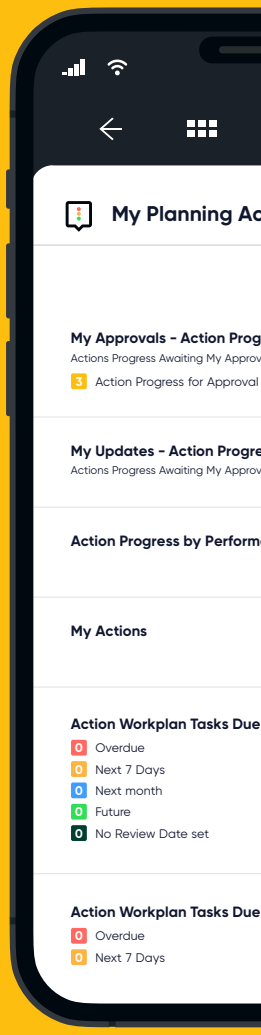

HR Analytics

Arm your team with the powerful insights needed to drive impactful change. Drill-down on data relating to head count, turnover and employee costs and delve deeper into your people to pinpoint underlying drivers behind staff trends to act before issues arise.

Performance Planning

Plan smarter, perform stronger

Strategically align your corporate and operational goals to drive strategic growth with a true SaaS solution to track and report on performance plans. Flexibility of the configuration options allows the system to be used for a range of purposes, from simple month-end results review capture to multi-tier strategic planning models.

Flexible Planning Framework

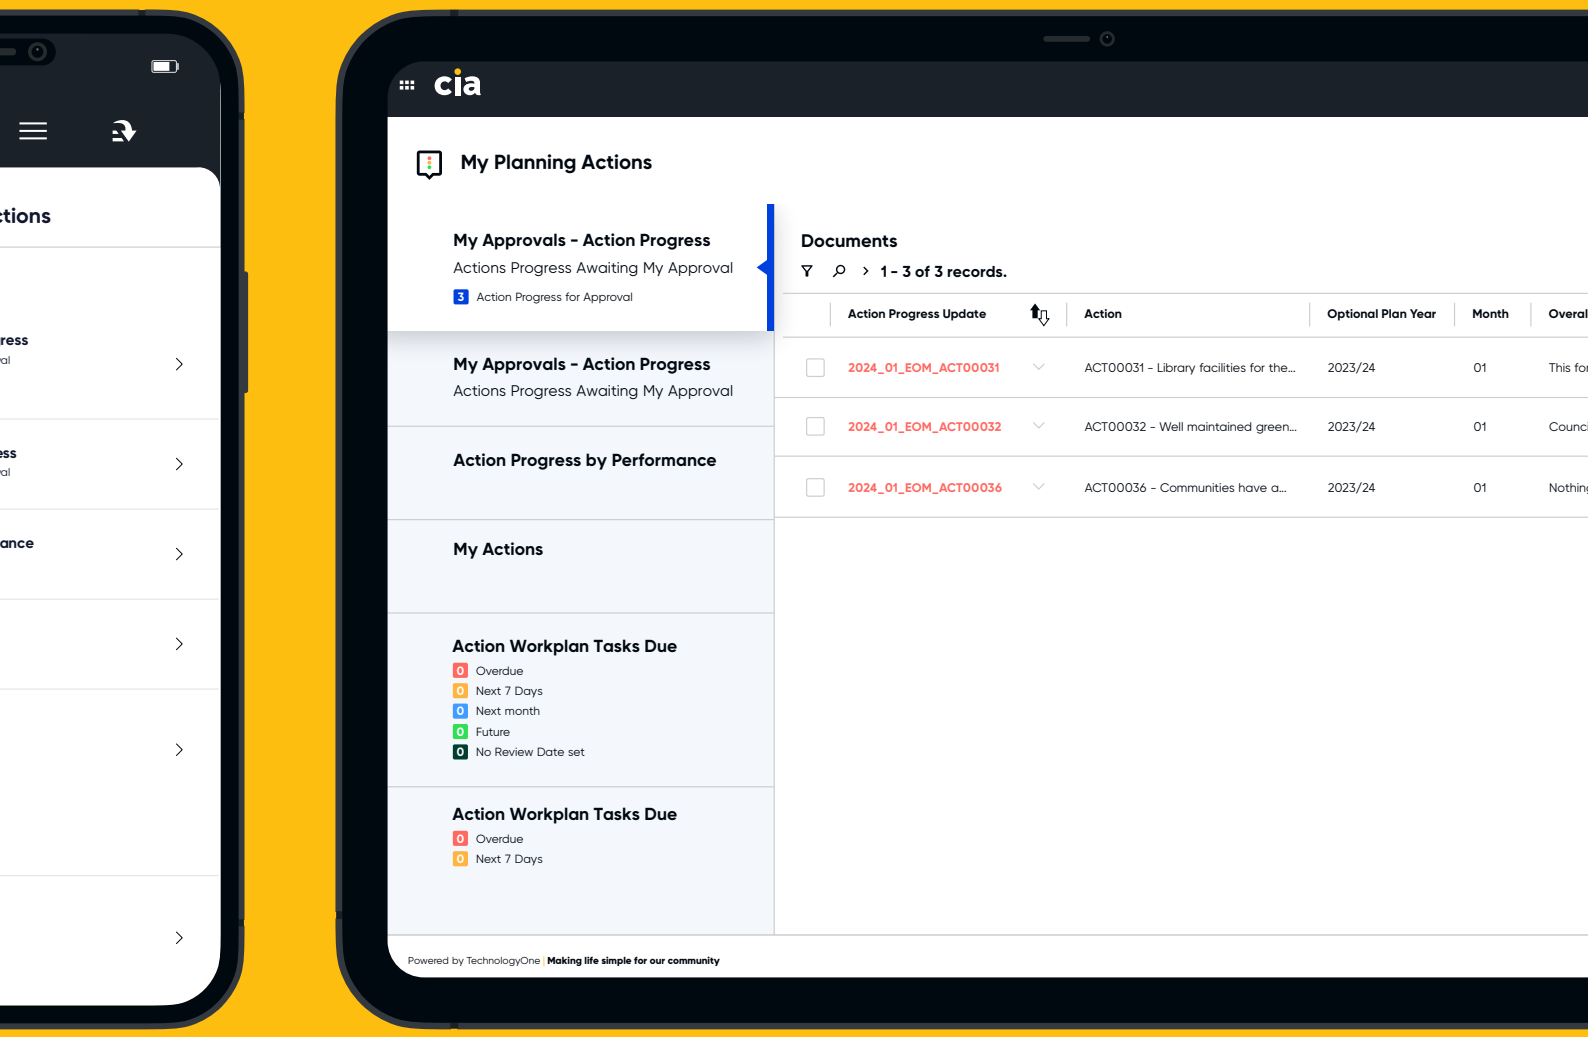

Design and manage strategic and corporate planning hierarchies aligned with your unique priorities and structure.

Comprehensive Measures

Define and track actions, KPIs, milestones, and statistics at various levels, facilitating performance monitoring and reporting.

Streamlined Progress Updates

Capture and record progress against plans and measures at defined frequencies, ensuring up-to-date performance tracking.

Collaborative Workflow

Enable team collaboration, assign responsibilities, and customise workflows for efficient planning and reporting.

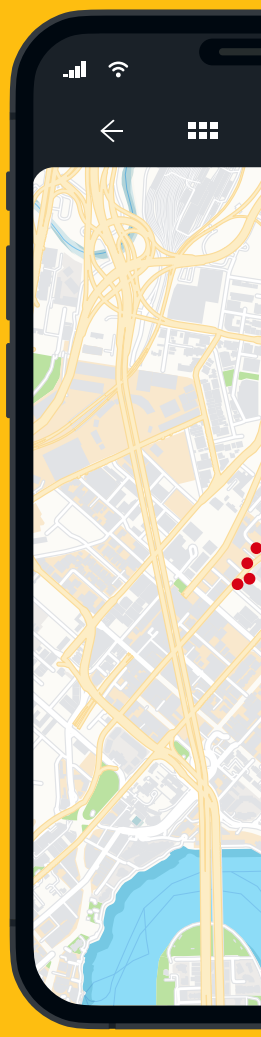

Reporting

Create and run ad-hoc reports and perform analysis using portlets, dashboards and graphical displays.

Integration

Easily integrate with other TechnologyOne products, automatically extract and update KPI data and import or export between Microsoft Office applications.

Spatial

Transform data into visual insights, bring information to life

Using your spatial and geographical data, easily create and deploy simple-to-use maps specific to your community's needs in a matter of minutes. Highlight spatial relationships and patterns to identify issues, forecast trends and implement strategic interventions, leading to more sustainable and resilient communities.

Enterprise Maps

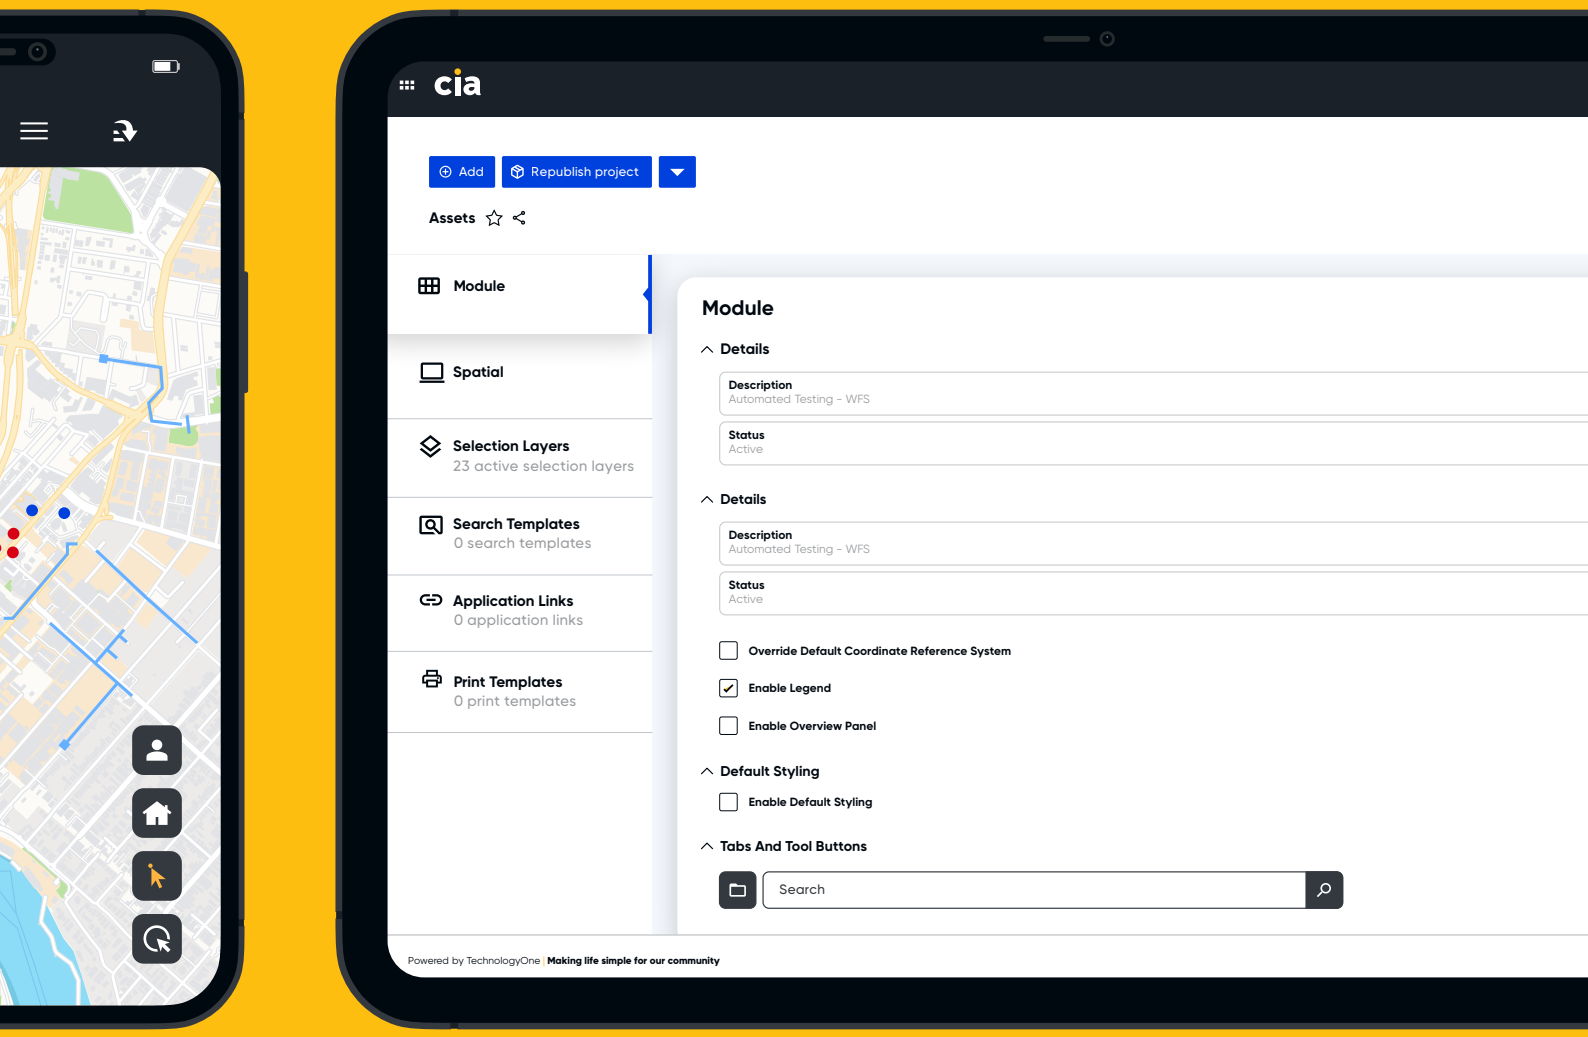

Employyes can access information from across your enterprise using a centralised spatial data portal on any device, anywhere, at any time. Determine changes over time, and quickly understand historic progression and the impact decisions have around city planning, infrastructure, nature protection and community service.

MapBuilder

Empower your customers to easily search within a map or via an address to find the most up-to-date information about their local services and facilities around the clock. Enable employees to create, manage and publish website-ready maps within minutes.

Public Maps

Transform the way your business creates, deploys and shares information with the public through a simple, intuitive map interface. Easy-to-use tools enable staff to quickly publish and manage your publicly available data.

Advanced Reporting

Harness the power of your spatial data and maps with our Advanced Reporting capabilities. Leveraging spatial intelligence, our reporting tool goes beyond traditional metrics, offering dynamic visualisations that overlay crucial information onto interactive maps.

CiA Maps for Enterprise Asset Management

Integrate enterprise grade mapping capabilities with your asset data. Represent spatial point, line and polygon data using styling and symbology and incorporate asset attributes.

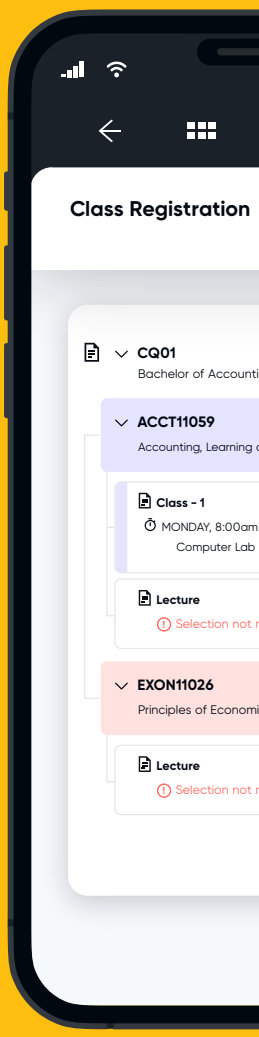

3D Capabilities

Use embedded tools to understand and visualise on a 3D map the impact of things such as new planned buildings, or a change in infrastructure.

Student Management

Enhance the student experience

Underpin future growth by delivering a state-of-the-art student experience with self-service capabilities and efficiencies. Automate manual processes to reduce administrive burden, while enabling your educational institution to streamline enrolments, support overall retention and make the most of your resources.

Enrolment to Graduation

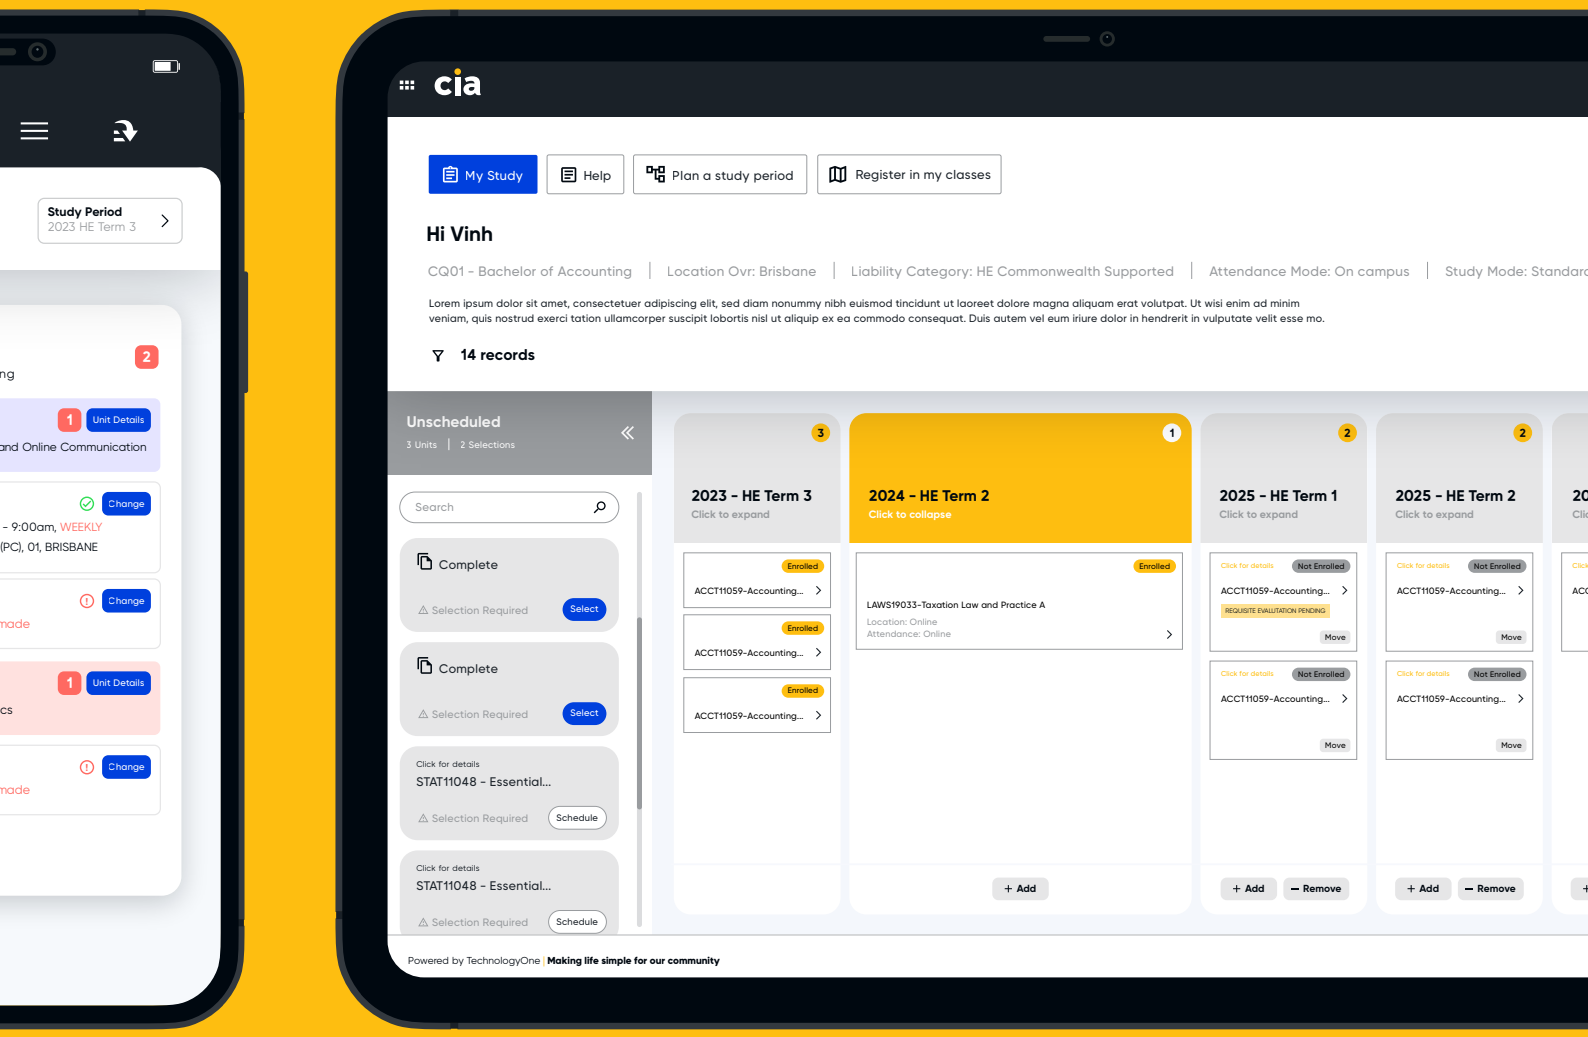

Make managing the entire student lifecycle easy by centralising all student data, automating workflows for enquiries and application assessment and facilitating graduations and completions.

Reporting and Analytics

Easily track and monitor student performance, examinations and progress with powerful integrated dashboards, providing full visibility of your critical information.

Student Case Management

Improve student success and deliver tailored support by tracking student interactions and conducting thorough analysis of academic performance and progress, enabling effective intervention and streamlined case management processes.

Course Management

Design, develop, approve and circulate academic programs and curriculum proposals.

Personalised Dashboard

Equip students with the power to manage enrolment, class allocation, personal details and fees with self-service portals and engaging dashboards

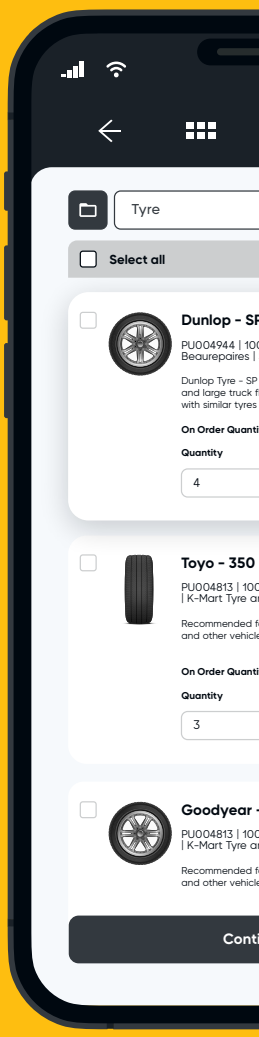

Communication Tools

Better connect your students, academics and staff with enhanced communication tools to access real-time information from on any device, anywhere, at any time.

Supply Chain Management

Seamless supply, limitless success

Transform your supply chain into a streamlined, agile powerhouse by simplifying tasks such as ordering and inventory management while ensuring compliance with procurement policies through embedded workflows and approvals. Get a clear picture of the supply and use of goods and services to ensure transparency, efficiency, and cost-effectiveness when it comes to spending.

Supplier Management

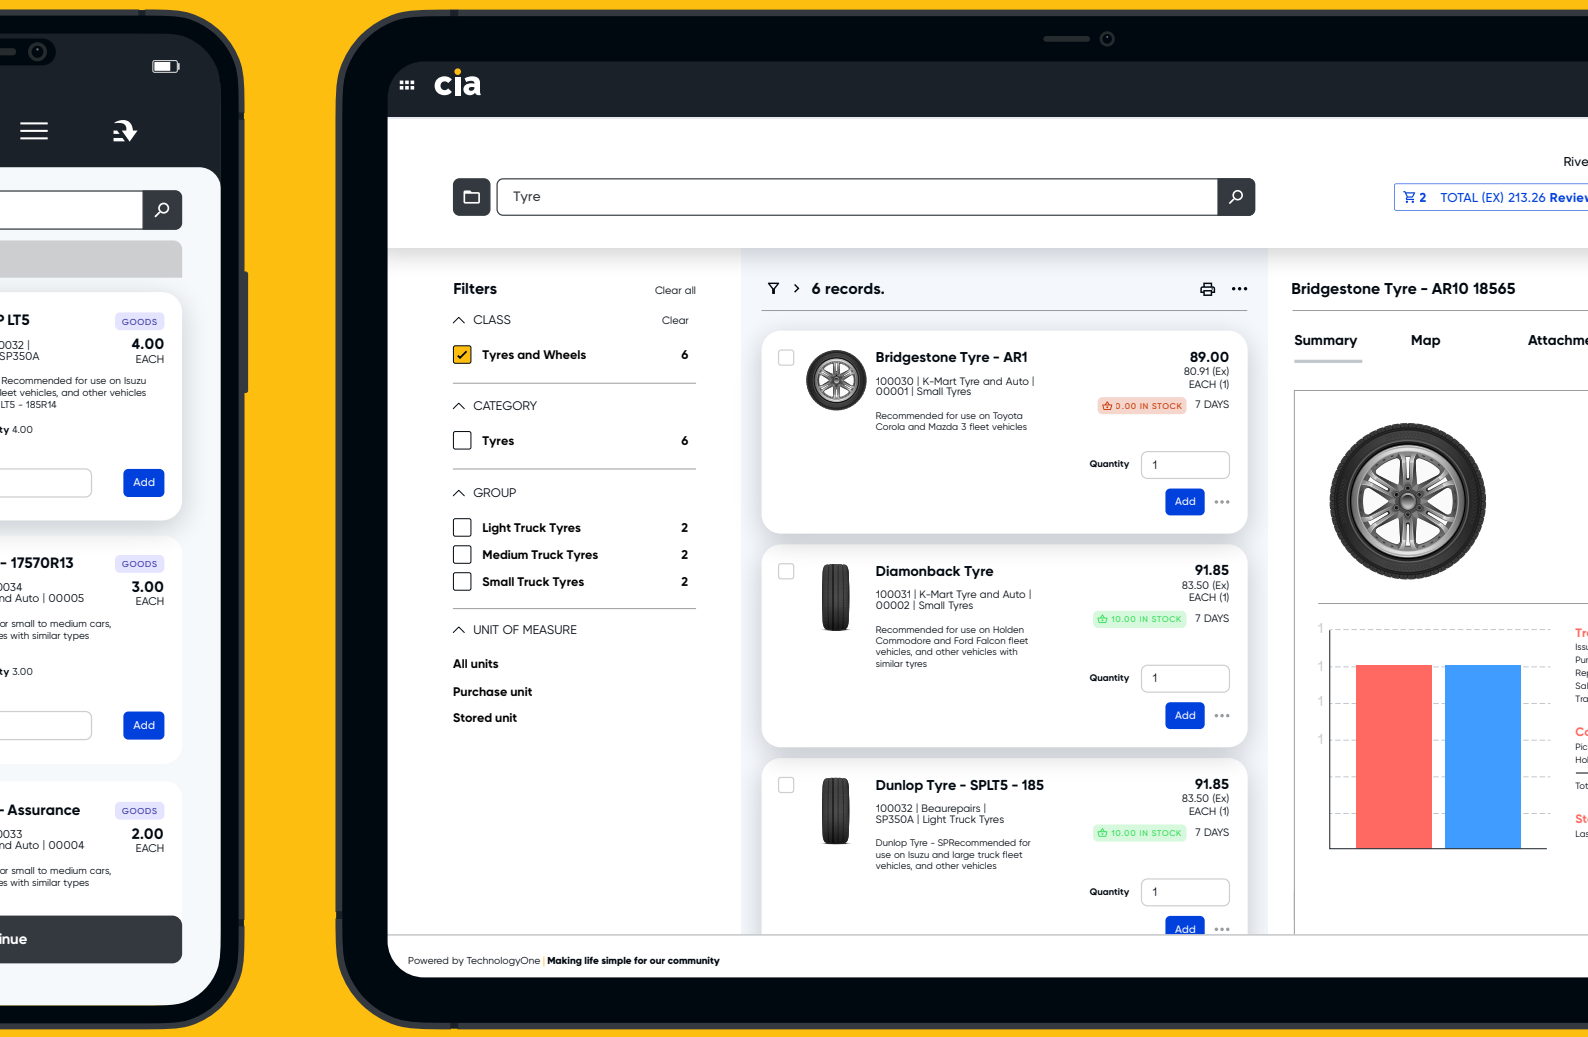

Save time and boost efficiency by giving suppliers access to a simple self-service supplier portal to manage their account, tender and contract information and enable easy two-way communication.

Contract Management

Eliminate manual paperwork and automate processes with an integrated and centralised system to manage the full contract lifecycle with flexible contract types built for your institution's requirements.

Procurement Management

Transform your procurement process into a strategic and proactive operation with streamlined contract management, integrated procurement policies, commitment tracking and automatic supplier interactions.

Inventory Management

Automate, streamline and simplify inventory management with integrated mobile device barcode scanning, automated stock replenishment and predefined approval workflows.

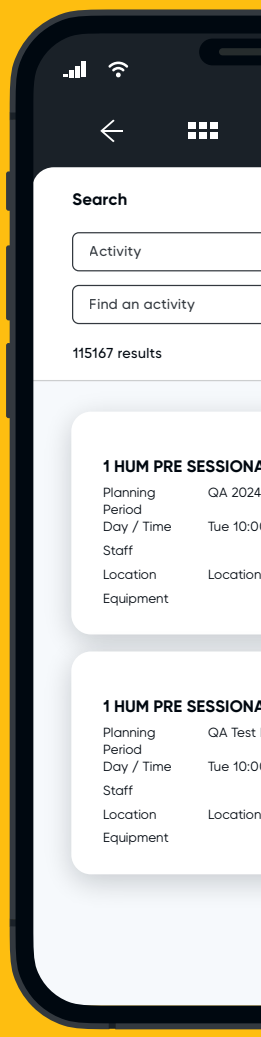

Grants Management

Streamline grant applications and maximise your revenue with a centralised platform allowing a single process and lifecycle view of every grant program your organisation manages.

Analytics

Better understand your supply chain operations and identify ways to improve efficiency, reduce costs and manage risk and compliance with real-time data insights and simplified reporting.

Timetabling and Scheduling

Complex scheduling made simple

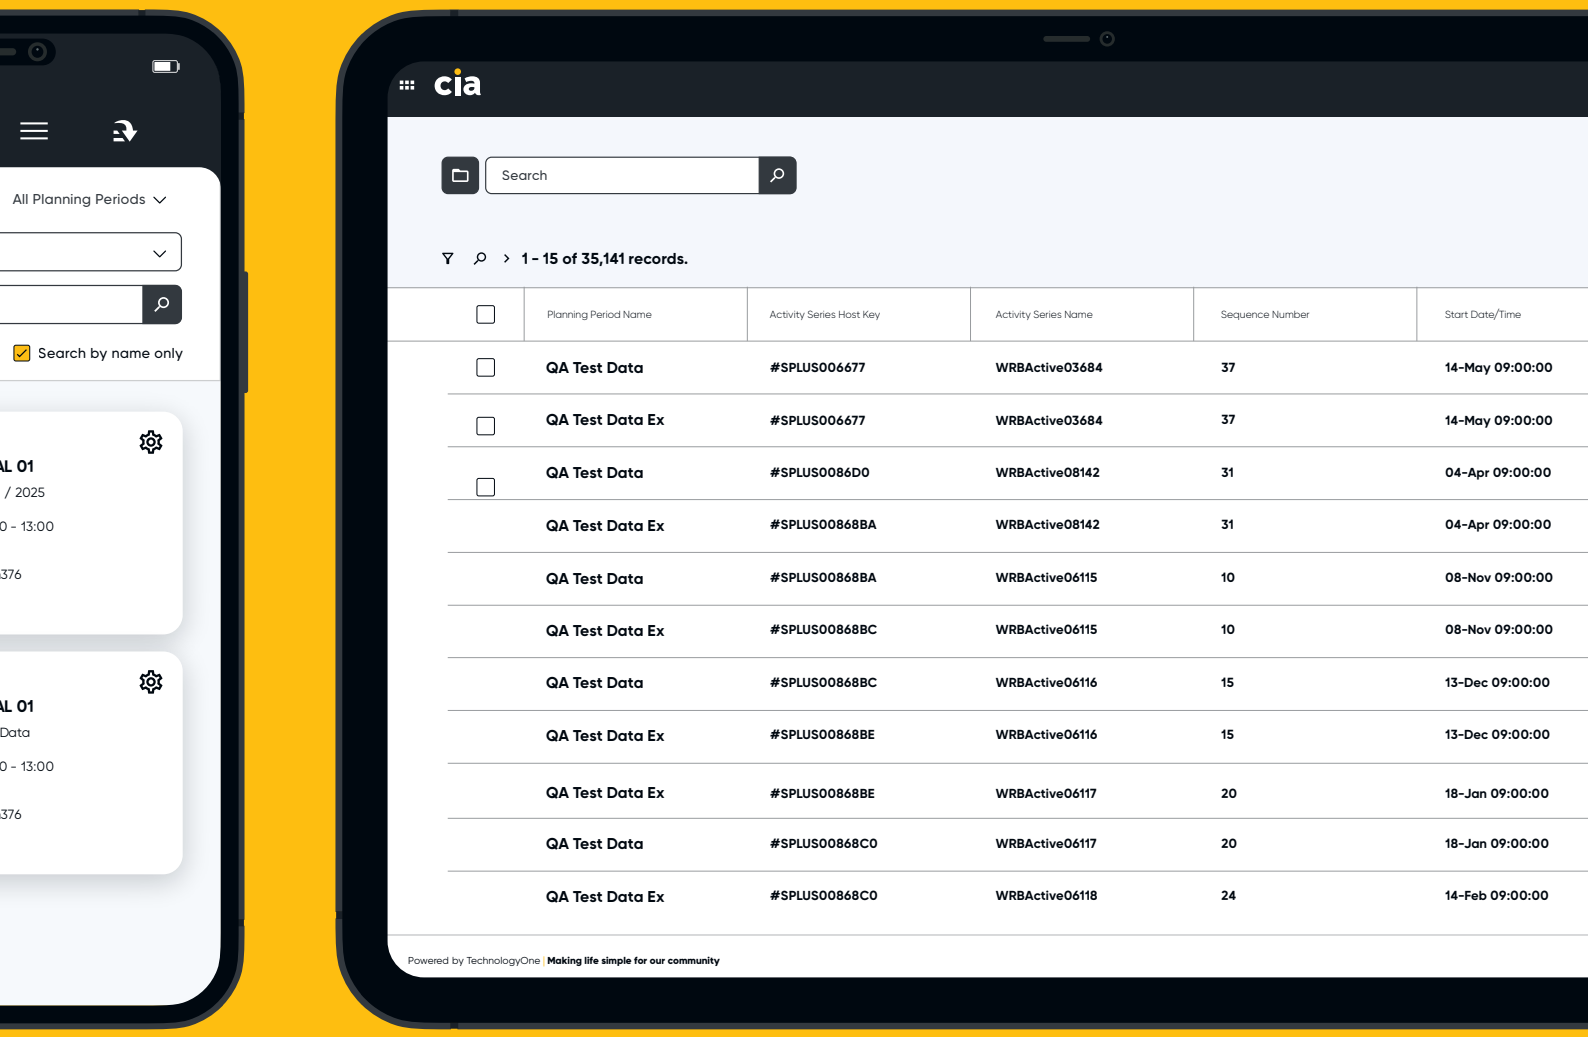

Make complex scheduling simple and enhance the student experience with our powerful and intuitive tools, saving institutions time and money. Foster a more organised and responsive learning and teaching environment for both students and staff while allowing you to focus on your core mission.

Class Scheduling

Auto-schedule timetables with the ability to set constraints. View and edit timetables, allocate staff, students and resources to activities and detect and resolve scheduling issues.

Exam Scheduling

Enhance the student experience with a dedicated scheduling engine that allows you to create balanced exam timetables. Automatically cater for students that require additional exam adjustments and consider time constraints of staff and invigilators.

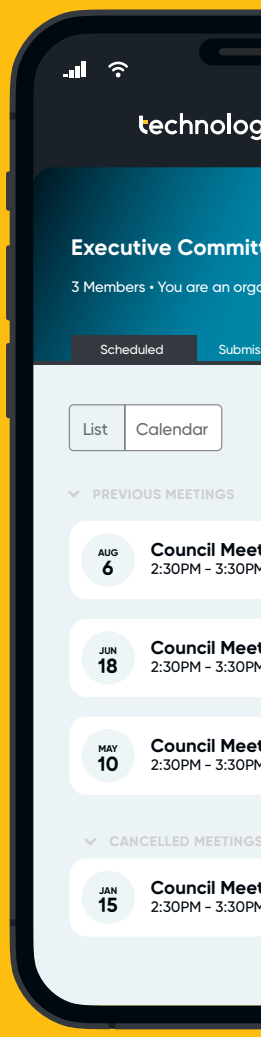

Resource Booking

Empower students and staff to manage room and resource bookings on any device, anywhere, at any time, reducing your institution's workload. Easily display timetables on digital panels and enable instant room bookings directly outside the room.

Personalised Timetables

Deliver draft and final personalised timetables to staff and students through a responsive web interface, available on any device. Notifications keep them up to date with last-minute changes.

DxP Essentials

Effortlessly meet business needs, wherever you are

DxP Essentials allows users to leverage artificial intelligence to easily capture and claim expenses on the go to get paid faster. From submitting claims for approval to reimbursing expenses, you can expedite the process and ensure your employees are paid in a timely manner.

Smart Receipt Scanning

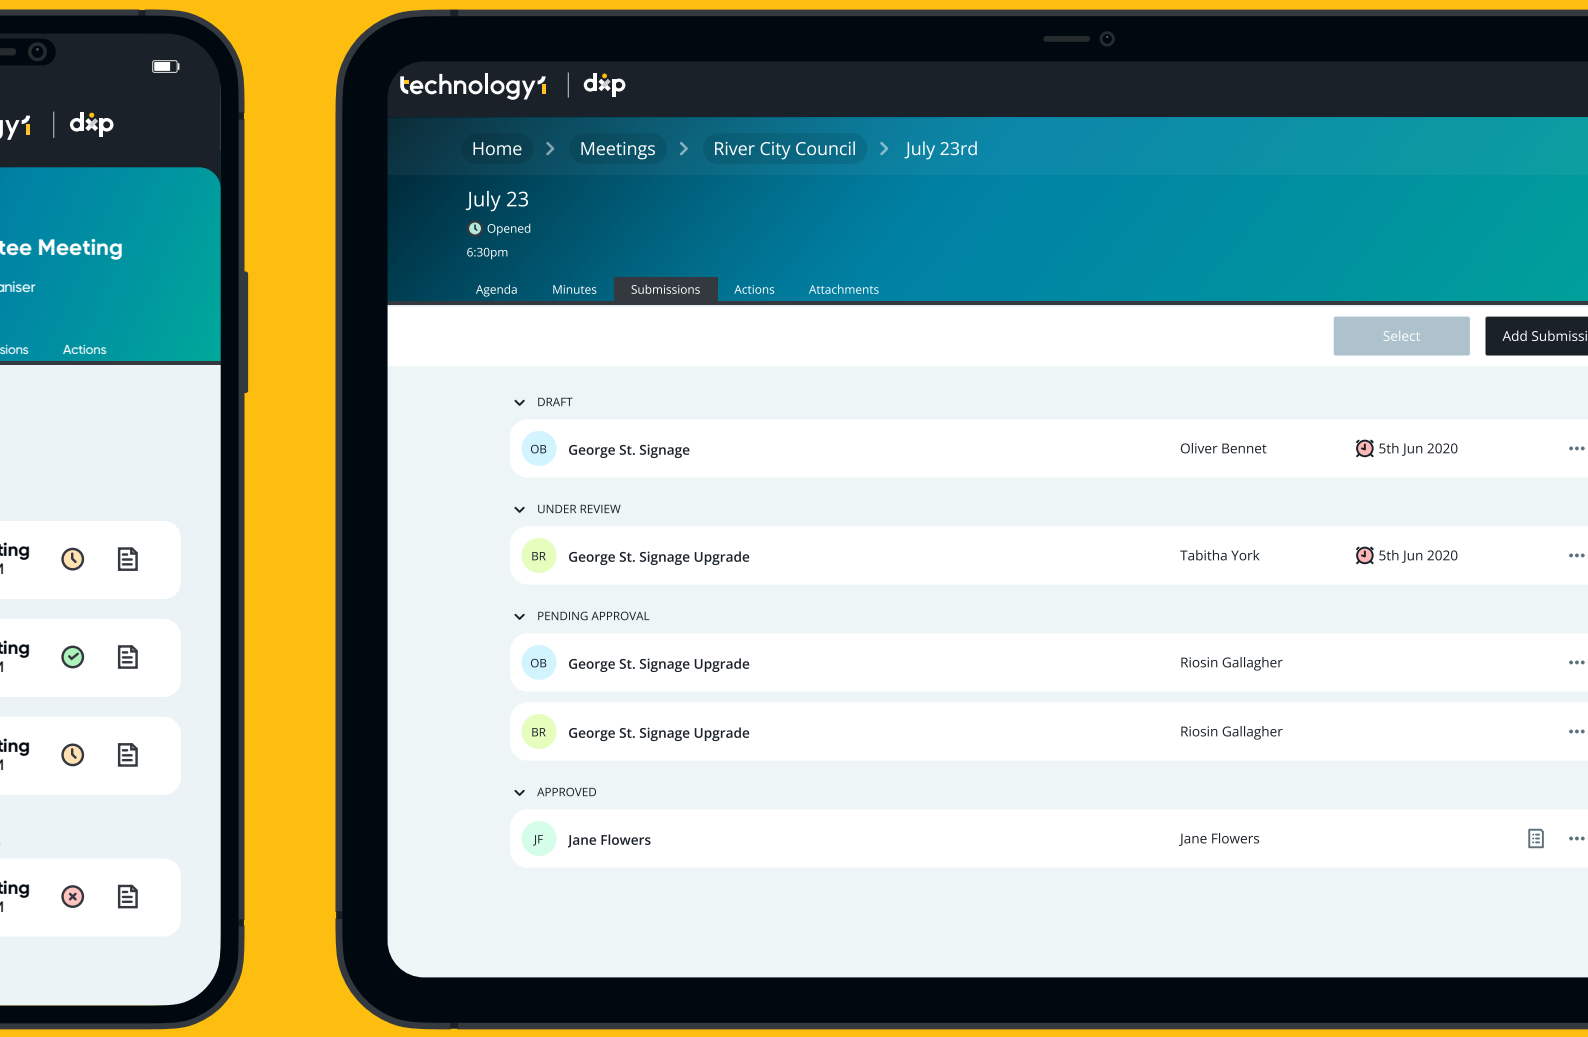

Streamline your expense process with Optical Character Recognition (OCR) receipt scanning. Simply scan your receipts on the go, and our powerful AI-driven OCR categories expenses and populates fields into your expense claim including description, date and total amounts.

Mileage Support

Save time with mileage support - pre-define mileage rates for your organisation, making claiming eligible transportation costs easier than ever before.

Meetings & Agendas

Gain back time with the ability to create, manage, and run meetings based on standard templates and workflows. With simple agenda, distribution, and publishing capabilities, our solution allows you to stay focused on what really matters.

Submissions

Set yourself up for success by knowing where your meeting submissions are at any given time. With workflow reviews and approval channels, you can create, manage and provide updates on submissions using powerful templates and workflows ensuring consistency and compliance.

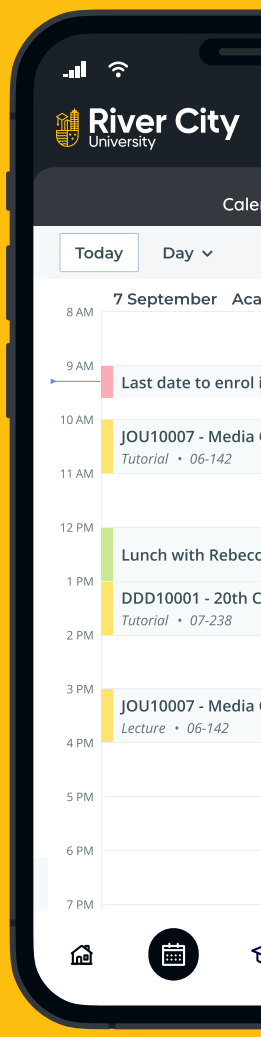

Company Expense Policies

Configure expense policy rules for your organisation and take the guesswork out for employees, with set approval workflows including inbuilt financial delegation enforcement.

Minutes

Ensure no information is lost and your minutes accurately reflect all actions recorded in meetings. Directly create minutes online and use workflows to facilitate the approval of minutes in a traceable, repeatable fashion.

DxP
Student

Simplicity in the hands of your students

DxP Student simplifies the student experience and allows them to focus on their studies without the hassle of administrative tasks. Help keep students on track with data analytics that identifies when they may be struggling and guides them to the appropiate support and services through a tailored experience.

Streamlined Application Process

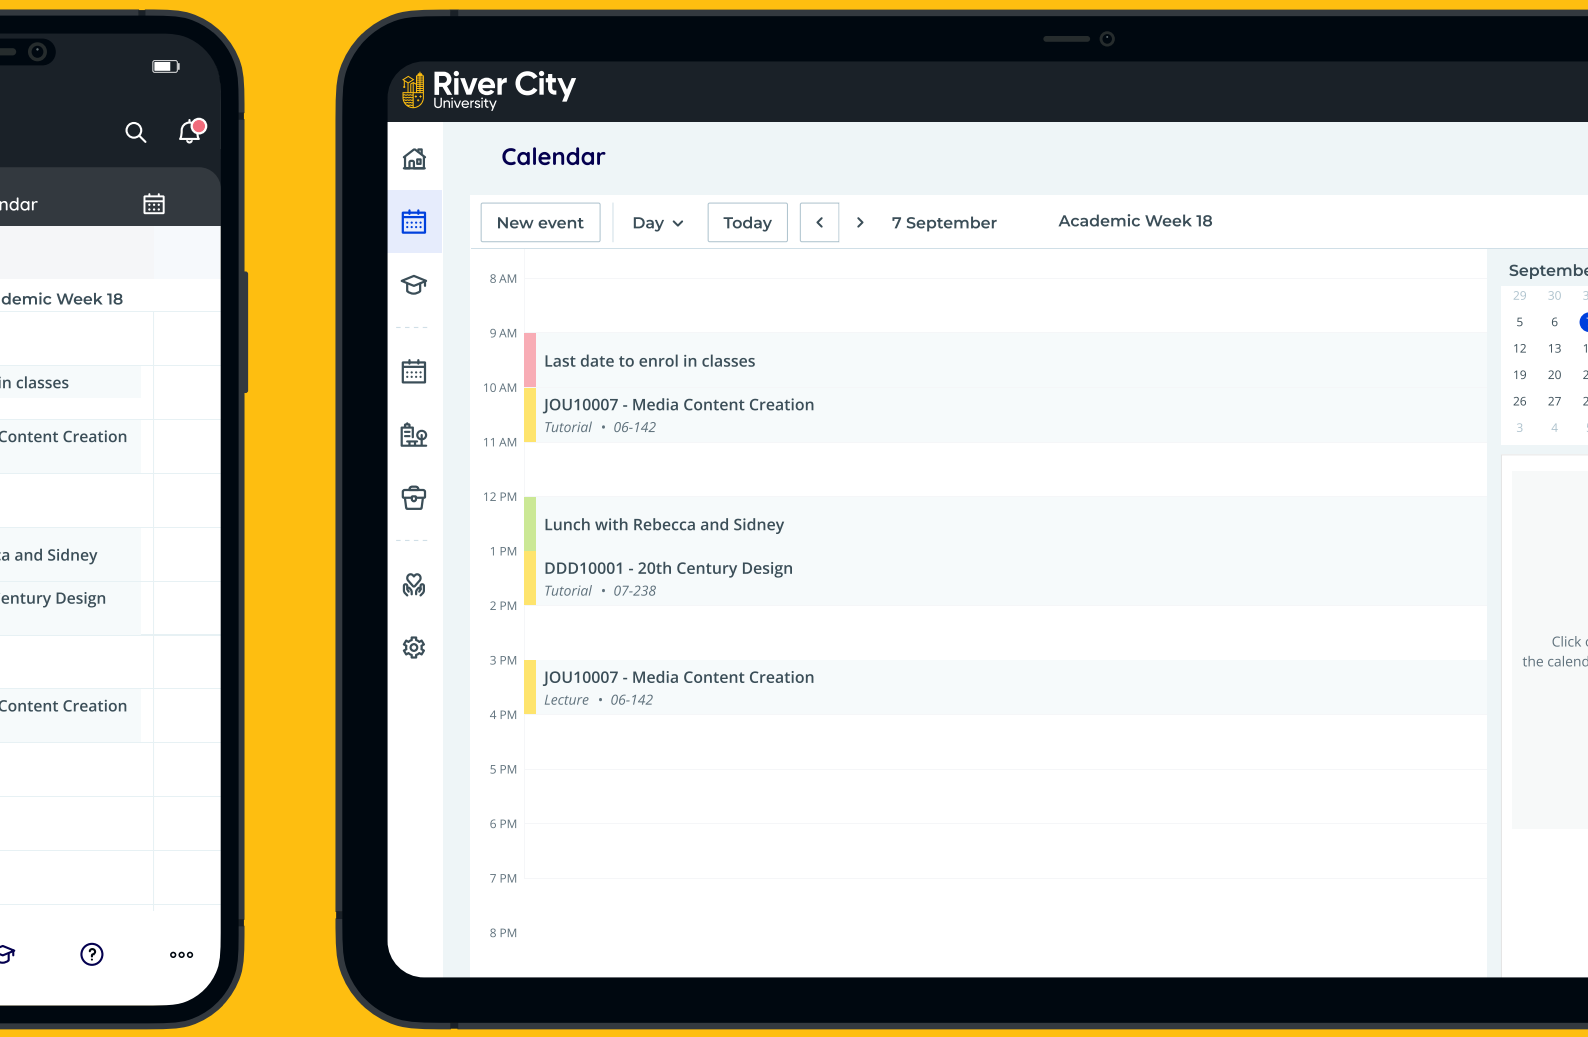

Simplifies the application process, allowing students to easily search, compare, and apply for courses from a single platform, reducing the time and effort required.

Reduced Errors

Minimises the chances of errors in the application process by providing clear instructions, validation checks, and reminders for missing information.

Real-Time Status Updates

Provides real-time notifications and updates on the status of applications, keeping students informed throughout the process.

Personalised Learning

Provides tailored content and recommendations based on the student's course, performance, and interests, supporting individualised learning paths.

Access to Resources

Offers quick access to helpful reads and FAQs, such as payment options, disability support and study materials, making it easier for students to find what they need.

Time Management

Includes tools like calendars, reminders, and study planner to help students manage their time effectively and stay organised.

Solution enablers

Business analytics

Analyse operational and strategic information and present this in reports and dashboards using a range of visualisation tools such as charts, tables, word clouds, slicers, media and more.

Business process automation

Build best practice into your everyday processes. Automate simple tasks and sophisticated processes with customisable clocks, workflows and approvals.

Digital forms

Create, streamline and automate the collection of information from suppliers, students, employees and other stakeholders with integrated forms.

Digital branding

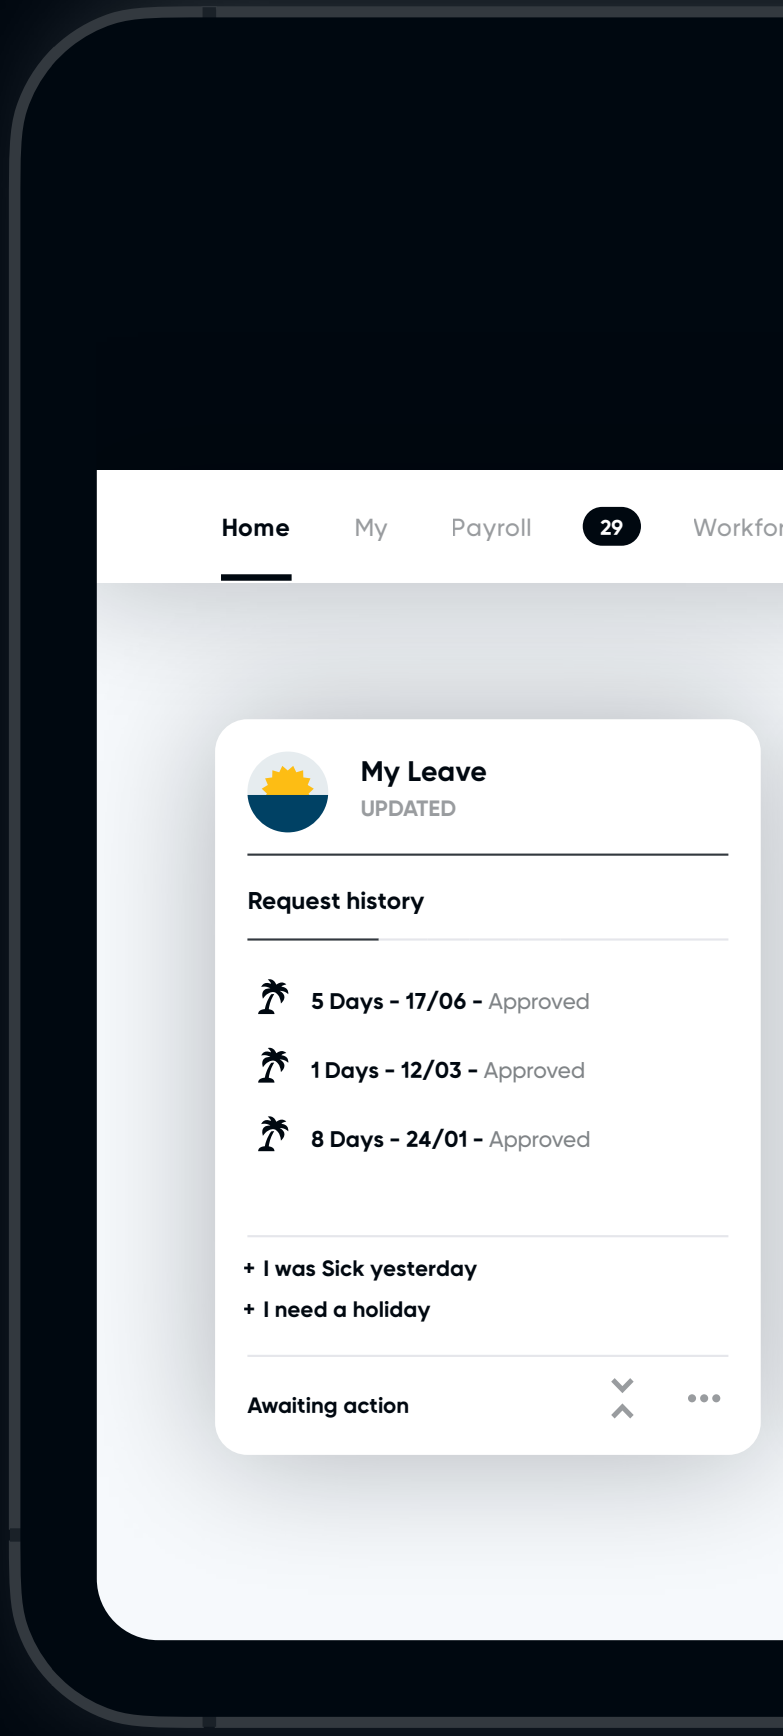

Standardise digital stationery across your business to produce recruitment letters and statements seamlessly.

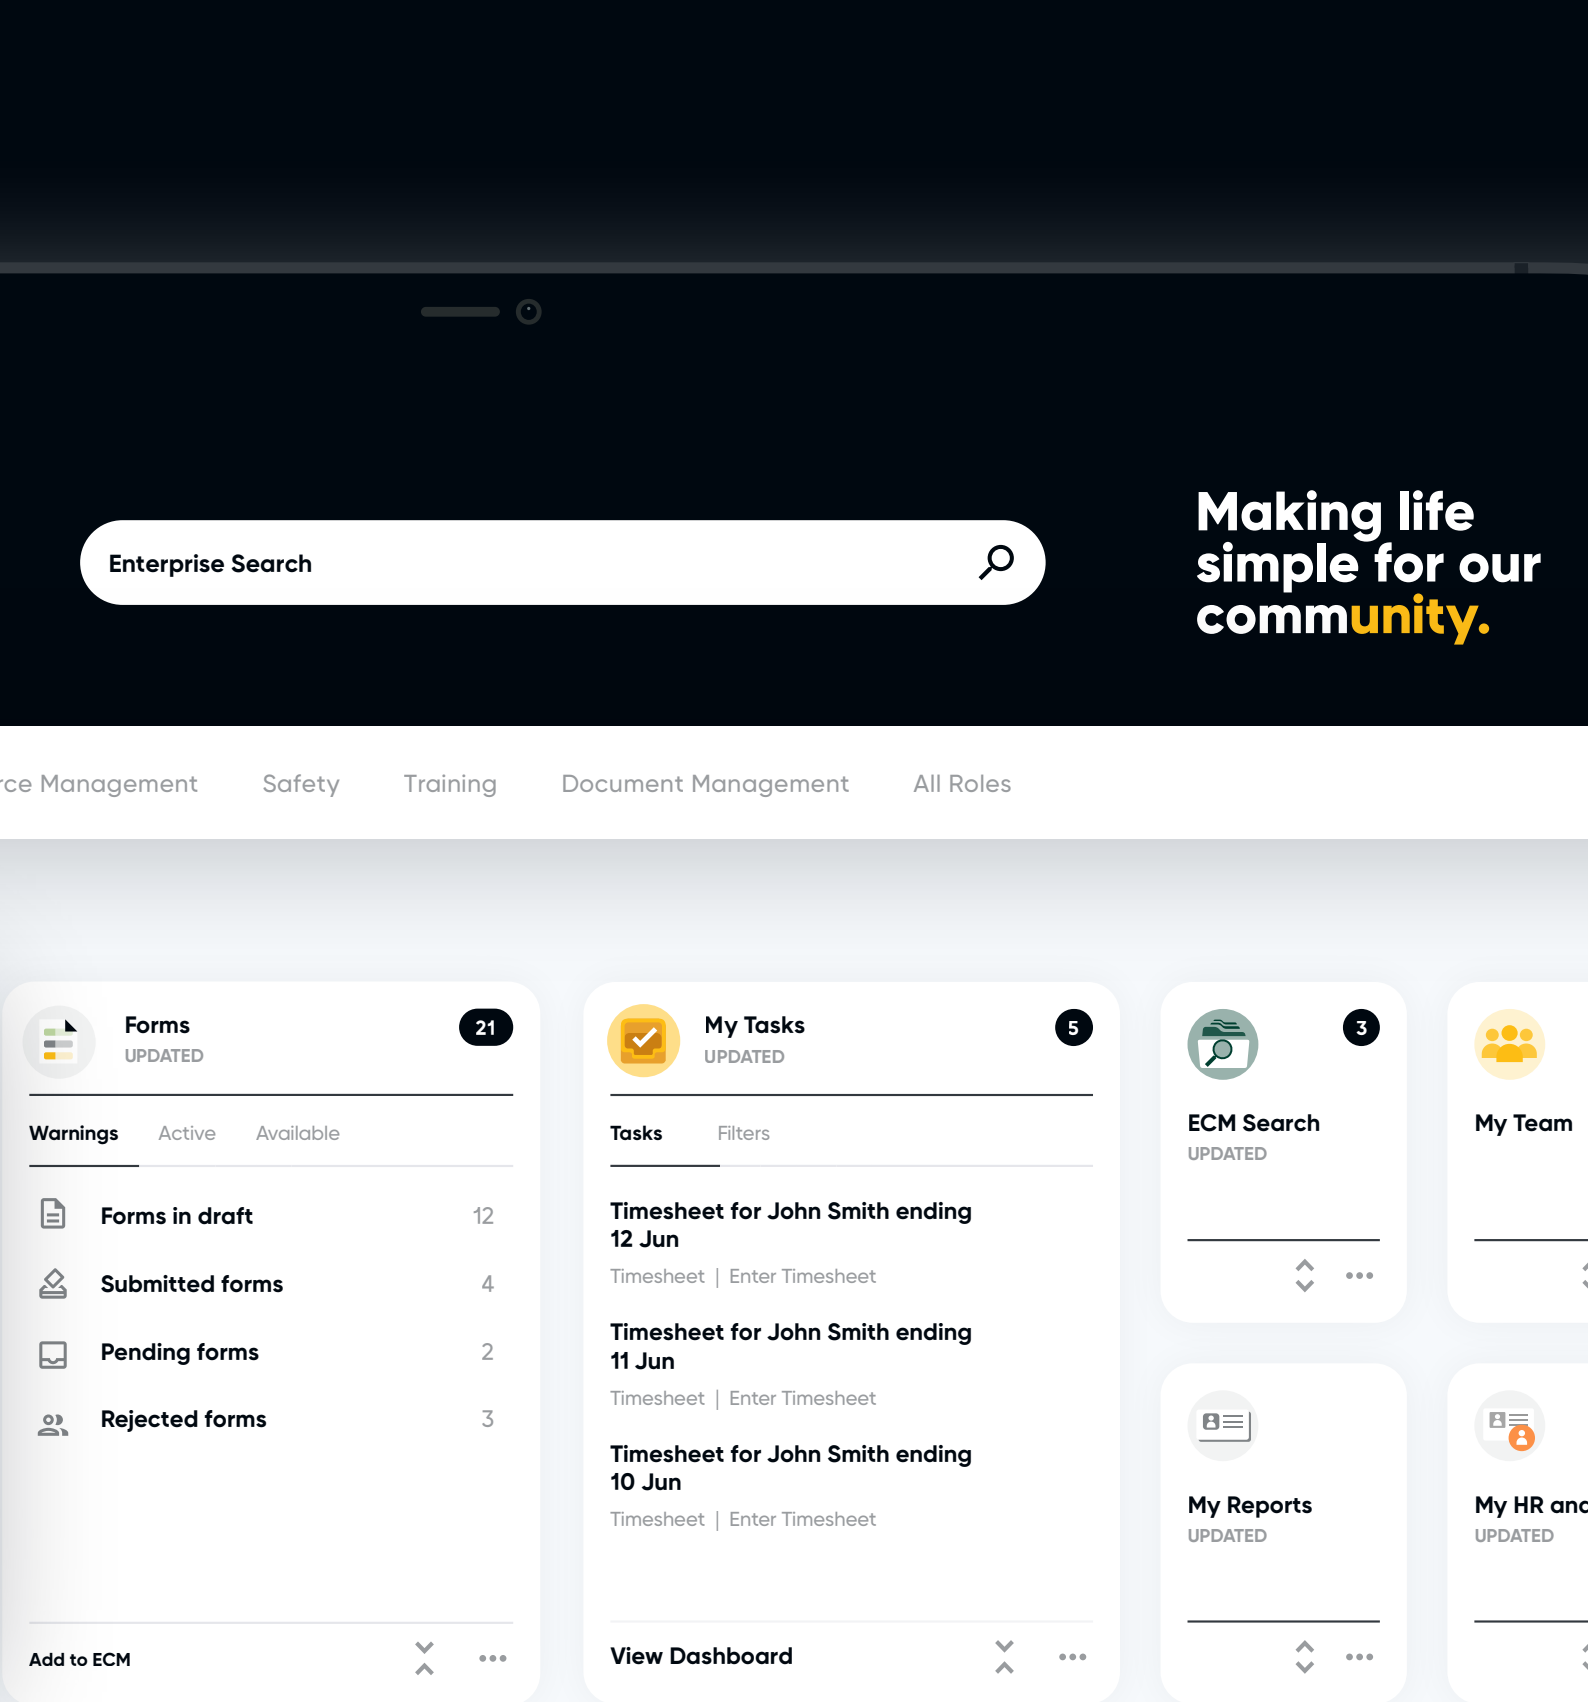

Interactions and correspondence

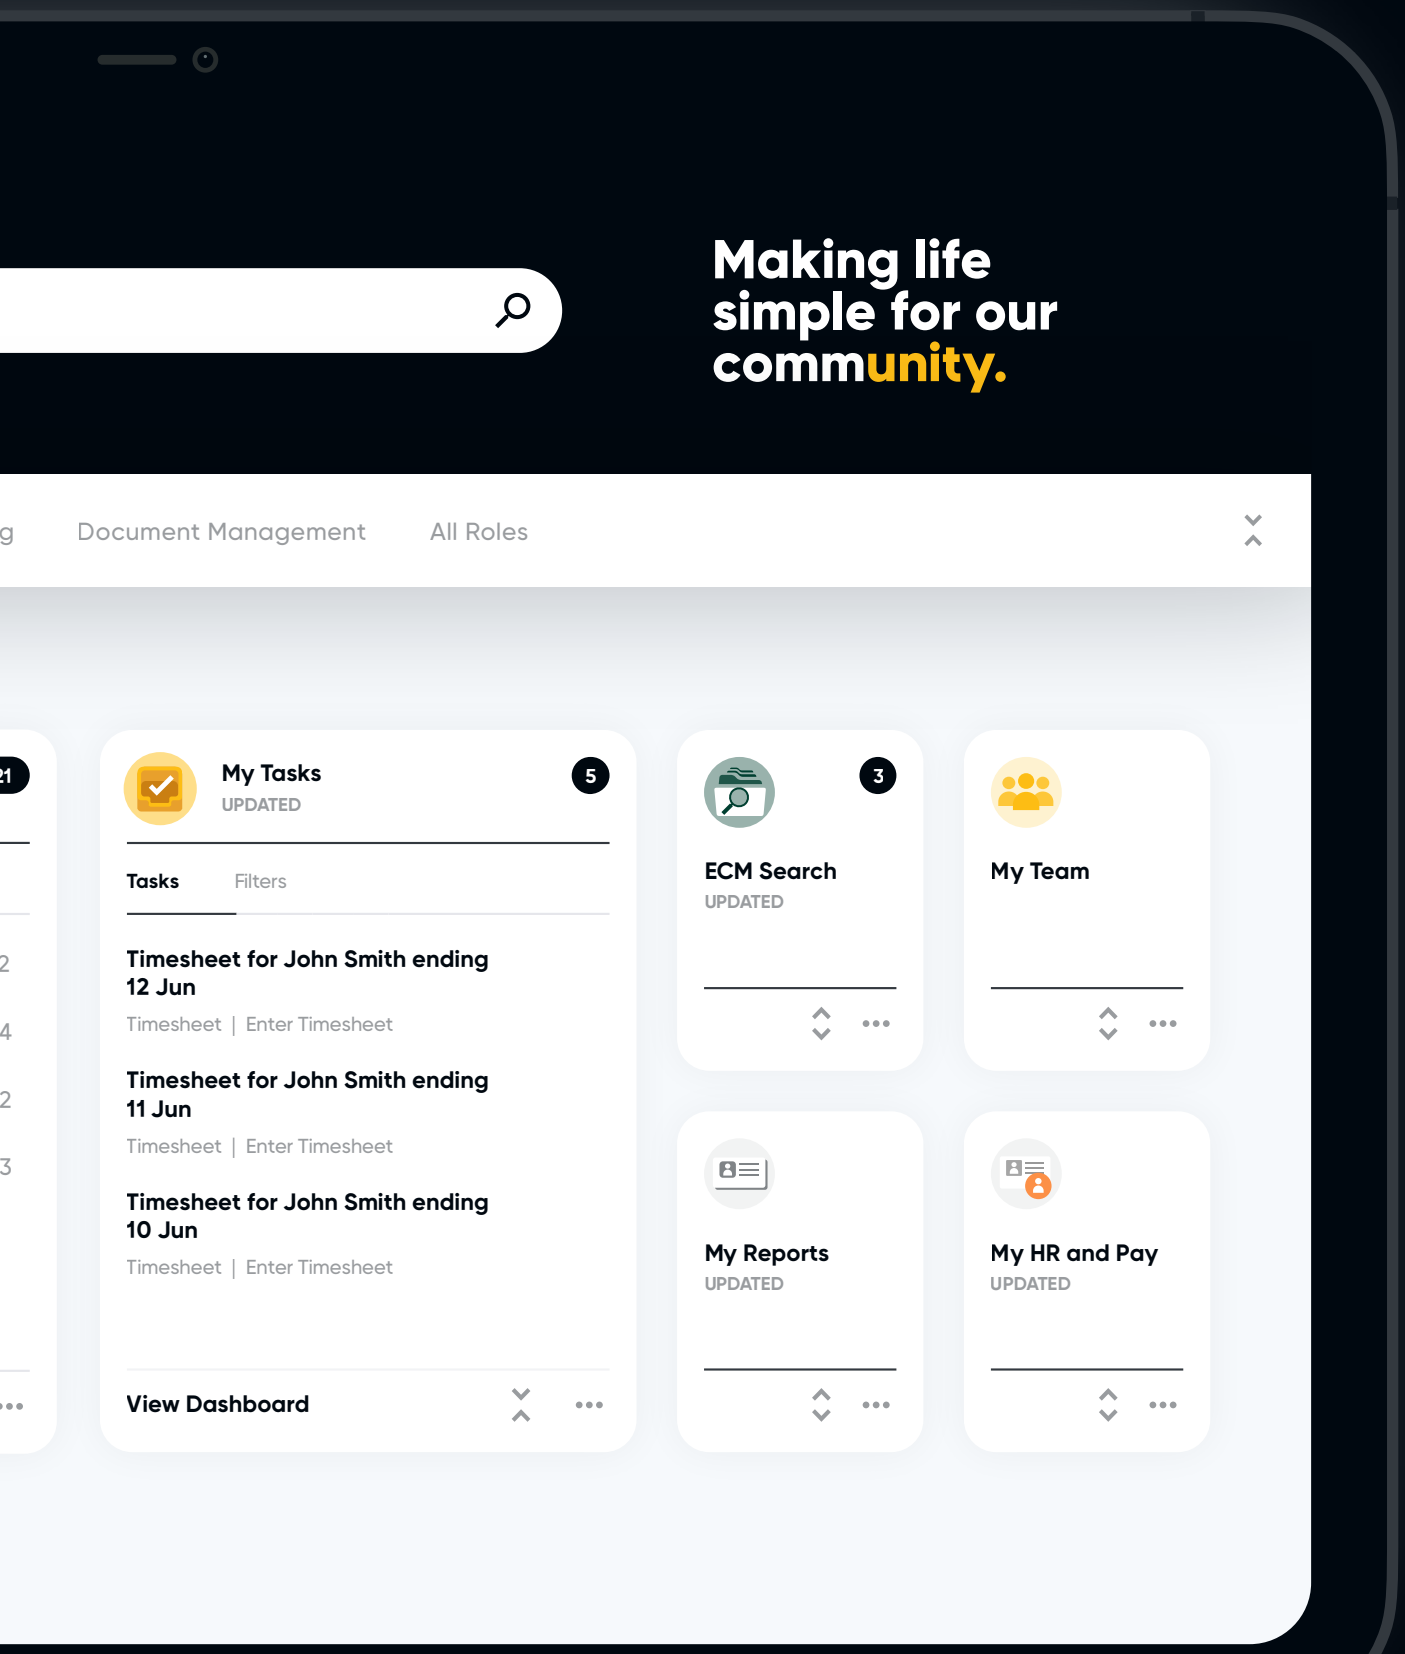

Create a 360-degree of all user interactions and simplify communications with powerful tools.

Portals

Provide self-service capabilities for all users to access real-time information from any device, anywhere, at any time.

Consulting services

From implementation to transformation, get the consulting services and support you need to ensure continued success.

Work shoulder-to-shoulder with experienced consultants who are aligned to your industry and have instant access to the latest TechnologyOne software.

Our consulting team has a proven implementation methodology and track record of project delivery, ensuring a seamless onboarding experience in the lead up to 'go live'– so you can confidently take control of your solution. Access ongoing consulting services to operate, maintain and optimise your solution. Our Application Managed Services (AMS) team will assign you with a dedicated Service Delivery Manager so you can keep pace with enhancements and leverage a best practice approach.

Support

Access self-help options, collaborate with others, find answers to questions and manage your support cases in our online Customer Community.

Our global support teams take a collaborative approach to ensure your success, engaging with you through multiple channels to ensure you receive an exceptional support experience.

Training and resources

Gain the knowledge to succeed and work more efficiently in your day-to-day role.

Led by our expert consultants, our training courses will teach you new skills and helpful tips and tricks. You can also access hundreds of online resources via the TechnologyOne University, so you can learn at your own pace.

The highest level of cyber security

Secure your digital environment and reputation against threats with stringent protection across your systems.

Through the power of SaaS, continuous and automatic upgrades ensure your organisation has the latest protection against emerging threats.

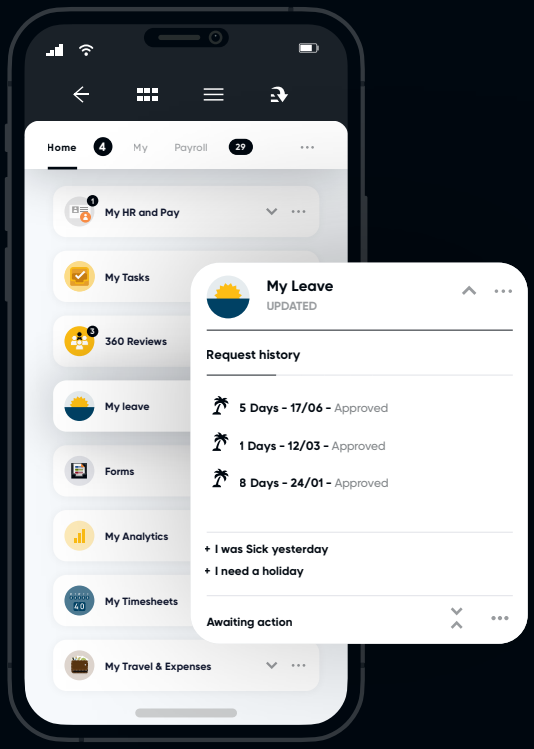

TechnologyOne is an industry-leader in cyber security, with the above security compliance certificates.

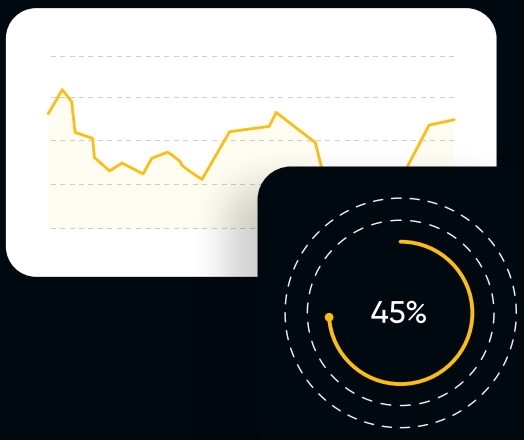

Our ~~code~~ no-code configuration

Tailor our solution for your specific needs with no programming or coding required.

Discover deep functionality for your organisation through an application that adapts to suit your unique needs. CiA is designed to seamlessly integrate with your systems to deliver an interconnected and unparalleled user experience.

Unleash streamlined functionality and cutting-edge efficiency for your organisation with faster time to value.

Real-time dashboards

Organisations must make strategic decisions to future-proof and give themselves a competitive edge.

Thrive in the face of challenges with dashboards that integrate and streamline real-time data to inform future spending and strategic decision-making.

Empower your organisation by improving efficiencies and eliminating manual and duplicated processes, reducing costs and empowering your staff to focus on your community.

SaaS+

With SaaS Plus TechnologyOne, delivers an end-to-end, customer centric solution so you can focus on serving your community.

Maximising our 'Power of One' promise, we're leveraging our unique domain expertise and taking full responsibility for the whole solution experience - reducing risk and saving you time and money.

One plan, one price, one point of call. SaaS Plus delivers:

- An all-inclusive offering tailored to the industries we serve.
- All aspects of TechnologyOne's enterprise solution.
- A single yearly fee covering all costs to implement, run, support and upgrade the solution.

Why SaaS Plus?

SaaS Plus is designed to help solve the three greatest impediments to digital transformation: time-to-value, cost, and complexity. It provides customers with a one-stop-shop, reducing much of the complexity, duplication and risk traditionally involved in ERP projects.

TechnologyOne takes complete responsibility for building, marketing, selling, implementing, supporting and running our enterprise solution for each customer, to guarantee long-term success.

SaaS Plus provides:

- Quantified scope, outcomes and approach
- Improved time-to-value – faster ROI
- Reduced project and organisational risk
- Platform for growth and business efficiency gains
- Accelerated path to a continuous improvement model

Our people

At TechnologyOne, we believe in fostering a culture of innovation, creativity, and collaboration, and have created an environment that allows our people to thrive. This culture is built into the fabric of our business, driving high performance, and underpinning our success.

Our global team of more than 1,300 passionate individuals forms the backbone of our operations. At the heart of our workforce are our more than 400 developers, powering one of the largest Australian-owned Research and Development (R&D) centres for enterprise software. In addition to our R&D centres in Brisbane and Perth, we have offshore centres in Indonesia and Vietnam, extending our capabilities to better support our customers and products.

Our developers are leaders in their field who challenge conventional thinking and go beyond the traditional realms of development methodology.

Driven by a commitment to solving complex business problems for our customers, our team has delivered a massively broad and deep global SaaS ERP solution, competing and triumphing against multinational giants with tens of thousands of staff.

Our customers are our true north guiding the decisions we make, the people we employ and the processes we create. We continue to invest in our Compelling Customer Experience program, which gives our people the ongoing training and support they need to deliver outstanding customer experiences.

About TechnologyOne

TechnologyOne is a global Software as a Service (SaaS) company. Founded in Australia, we have offices across six countries. Our enterprise SaaS solution transforms business and makes life simple for our customers by providing powerful, deeply integrated enterprise software that is incredibly easy to use. Over 1,300 leading corporations, government departments and statutory authorities are powered by our software.

Our global SaaS solution provides deep functionality for the markets we serve, including local government and higher education in the UK. For these markets we invest significant funds each year in R&D. We also take complete responsibility to market, sell, implement, support and run our solutions for our customers, which reduce time, cost and risk.
